Proposal by the Secretary-General for 2014-2015 ^a	56 010 500

^a At 2012-2013 revised rates.

Overall orientation

- 23.1 The regular programme of technical cooperation, established by the General Assembly in its resolution 58 (I) in 1946, serves to support developing countries, least developed countries, countries with economies in transition and countries emerging from conflict in their capacity-development efforts. Those efforts are geared towards achieving internationally agreed development goals and the outcomes of United Nations conferences and summits, including the Millennium Development Goals. The programme's broad objective is to support and advance processes aimed at developing the capacity of Governments, through both individuals and institutions, to formulate and implement policies for sustainable economic and social development. The sharing of experiences across countries and regions, South-South cooperation, the use of national expertise from the beneficiary countries to the extent possible, and the building of knowledge networks to facilitate continued exchange and assistance and promote sustainability are characteristic of the programme.
- 23.2 The regular programme of technical cooperation enables the United Nations Secretariat to offer Member States access to the diverse global and regional specialized development expertise and knowledge readily available within the programme's implementing entities: the Department of Economic and Social Affairs, the five regional commissions (the Economic Commission for Africa (ECA), the Economic and Social Commission for Asia and the Pacific (ESCAP), the Economic Commission for Latin America and the Caribbean (ECLAC) and the Economic and Social Commission for Western Asia (ESCWA)), the United Nations Conference on Trade and Development (UNCTAD), the United Nations Office on Drugs and Crime (UNODC), the United Nations Human Settlements Programme (UN-Habitat), the Office for the Coordination of Humanitarian Affairs and the Office of the United Nations High Commissioner for Human Rights (OHCHR).
- 23.3 The capacity-development activities of the implementing entities draw substantively from their normative and analytical work and respond to the policy guidance and programmes of action agreed by Member States through the intergovernmental mechanisms. This enables developing countries to benefit from both the knowledge acquired through that work and from the experiences of different geographic regions, allowing for the sharing and exchange of innovative and good practices. Of equal importance is the contribution that the capacity-development work brings to the normative and analytical activities and, ultimately, to the support provided to the intergovernmental dialogue. The action agenda stemming from the outcome of the United Nations Conference on Sustainable Development is expected to be a major driver of country demands for services through the regular programme of technical cooperation, and, in turn, results achieved could provide important feedback to the new mechanisms established to implement the decisions taken at the Conference.
- 23.4 General Assembly resolution 67/226 on the quadrennial comprehensive policy review of operational activities for development has affirmed the programme's key orientations, such as

3 13-31175

South-South cooperation, the promotion and transfer of new and emerging technologies, the use of national expertise, and supporting knowledge-sharing, including in the compilation of best practices and successful development experiences. At the same time, the quadrennial comprehensive policy review also stresses a number of strategic orientations for capacity-development activities, including on the mainstreaming of sustainable development, support to countries on inclusive, equitable, participatory, transparent and accountable national processes, assigning highest priority to poverty eradication and strengthening national capacities to address poverty eradication.

- 23.5 The programme continues to be an important source of complementary technical assistance enabling the Organization to respond to specific requests for capacity development on issues that United Nations entities are mandated to address, but that may fall outside the established priorities of the voluntarily financed programmes and the expertise of United Nations country teams. It thus provides a vehicle through which countries can harness the expertise that exists within the United Nations development system, especially non-resident entities, in support of the wider set of mandates to implement the internationally agreed development goals, norms and standards. The ability of the regular programme of technical cooperation to respond flexibly and on short notice to specific requests of developing countries for small-scale but urgent requirements as defined by them, as well as to enable countries to forge common responses and approaches to address issues affecting countries with geographically shared boundaries, or facing similar situations, and to exchange and transfer new knowledge, skills and technologies, differentiates it from other technical cooperation support available within the United Nations system.
- 23.6 The strategic use of the resources of the programme is becoming more defined within the overall capacity-development strategy of the respective implementing agencies and is used complementary to other development funds, including the Development Account and extrabudgetary resources, which optimizes its impact through strengthened linkages and follow-through. Some entities have developed integrated working plans for their capacity-development activities to promote greater synergy across themes, as well as regional and in-country support.
- 23.7 Global and regional entities of the United Nations Secretariat implementing activities under the programme coordinate those activities through established internal mechanisms. The Executive Committee on Economic and Social Affairs, whose main focus is the harmonization of its members' programmes, helps to achieve a rational division of labour and complementarity between the global and regional entities by promoting programmatic coordination and identifying synergies for operational work. At another level, the engagement of implementing entities within the United Nations Development Group brings about greater awareness by a larger group of entities of the specific expertise and operational strengths available in the United Nations system, thereby increasing potential cooperation to implement projects and undertake operational work at the country level, and improving system-wide coherence in the context of relevant country processes and cooperation frameworks.
- 23.8 The implementing entities of the regular programme of technical cooperation are all non-resident agencies. As such, they engage with the Resident Coordinator and resident agencies to maximize the impact of country-level development work. Such cooperation allows access to up-to-date information on national development priorities and better positioning in the broader development cooperation environment. For resident agencies, it allows access to the knowledge and expertise of non-resident agencies. This cooperation can include joint programming, including through the common country assessment, the United Nations Development Assistance Framework and the poverty reduction strategy paper process, as well as joint needs assessments and, where appropriate, joint fundraising.
- 23.9 Many non-resident agencies have entered into institutional cooperation agreements with resident agencies, often in the form of memorandums of understanding. Some Resident Coordinators have a

4 13-31175

dedicated liaison officer to engage with non-resident agencies. There has been improvement in the non-resident agency/resident agency cooperation in terms of better communication and coordination, including through increased awareness of each others' mandates, participation in knowledge networking and better advance planning by the non-resident agencies when undertaking country missions by directly engaging with the resident coordination offices and resident agencies on country-level work. The ongoing work of the UNCTAD inter-agency cluster on trade and productive capacities is an illustration of the type of efforts to foster greater awareness within a particular thematic area, with the aim of increased cooperation. Ongoing efforts within the United Nations Development Group in further harmonization and simplification of programming and administrative processes and procedures, learning from the "Delivering as one" pilot countries' experiences and recommendations from the independent evaluation of "Delivering as one", are aimed at further enhancing the effectiveness and efficiency of the Organization's country-level work.

- 23.10 Cooperation with partners within the broader development assistance community, including the Bretton Woods institutions, the Organization for Economic Cooperation and Development (OECD), regional development banks and other regional organizations will continue to be pursued as partners work together to align with and improve coherence of development priorities among country clusters (least developed countries/landlocked least developing countries/small island developing States), within regional and subregional groupings, and at the country level for greater impact of the programme's activities in the field.
- 23.11 In line with General Assembly resolution 2514 (XXIV) and Economic and Social Council resolution 1434 (XLVII), activities financed under the present budget section will continue to focus on short-term advisory services, training and field projects as outlined below. Activities will be based on needs expressed by Member States and by regional and subregional cooperation groups, either at the request of a State or as guided by the intergovernmental process, bearing in mind the criteria set forth for the purposes and uses of the programme.

Short-term advisory services

- Advisory services ensure the provision of high-level technical expertise, the transfer of knowledge from global and regional entities to Governments on policy-related issues and development strategies and the formulation, assessment or evaluation of projects and programmes. The interregional and regional advisers represent the critical interface between the countries and the implementing entities, facilitating country-level access to the expertise of the Organization. The services are often provided through the modality of advisory missions, which are planned, implemented and followed up through mechanisms utilizing information and communications technology. Advisory missions often lead to the formulation of technical cooperation projects, implemented either by a Government or in partnership with a United Nations entity. Advisory missions also lead to Development Account projects, providing a natural platform to pursue longer term and sustainable support to the countries. This serves to enhance the multiplier effect and the longer-term impact of the mission. Advisory missions also provide technical support, including monitoring and evaluation, to nationally executed programmes, thereby ensuring that programme implementation is consistent with the outcomes of United Nations conferences.
- 23.13 In order to ensure that the pool of interregional/regional advisers represents the highest calibre of technical skills and knowledge, all implementing entities of the programme have committed to updating their advisory capacities, in order to be able to replace advisers as needed to ensure that they have the best skills and knowledge to respond to the changing needs of Member States. Extensions are reviewed on an annual basis by senior-level departmental panels, which include a review of the advisory services provided during the past period and an examination of a results-based workplan, which is fully integrated within the subprogramme's technical cooperation programme, for

the forthcoming period. While there is an annual review of the advisory skills needed during the next period, the positions are automatically redefined at the 5-year mark to better respond to the changing needs of countries and to address new and emerging concerns. This may result in a total change of competencies and skills or the redefinition of the positions' sectoral focus to address a specific technical area (for example, global geospatial information management).

23.14 In line with past intergovernmental guidance, the implementing entities have taken steps to utilize complementary mechanisms for the provision of advisory services, including the recruitment of short-term advisers who respond to very specific, distinct assignments of a limited duration, as well as consultancy assignments, where national and regional expertise are drawn upon, particularly when addressing issues which are country-specific, for which expert knowledge of national/regional issues is fundamental in ensuring the most relevant and targeted support. The entities also rely on national or regional institutions, particularly in the context of national workshops, which ensures the transfer of local knowledge and expertise and promotes local follow-up actions.

Field projects

23.15 Field projects to develop capacity may originate in response to either specific Government requests or proposals by the concerned entities in the context of their approved substantive work programmes. Such projects may be country-based but can also be interregional or subregional, and are geared towards testing and operationalizing new approaches to development needs or to filling gaps where funds from other sources are insufficient to cover priority areas. Field projects are often a collaborative undertaking of several entities aimed at maximizing the multiplier effect of the development cooperation activity.

Training

- 23.16 Training is aimed at building knowledge and skills that will contribute to strengthening national capacity for policy development and the effective implementation of national policies. Training is often conducted through seminars and workshops, as well as through the provision of short-term fellowships, which foster more in-depth reviews and opportunities for learning. The exchange of good practices and South-South cooperation are consistently fostered. The main consideration guiding the training conducted under the programme is that the topics should play a catalytic role in the development process and should contribute to linking local needs and conditions with the follow-up of major conferences. Even where the organizing entity is a global one, the participation of the relevant regional commissions is encouraged in the interest of sustainability and continued regional support after the event.
- 23.17 The overarching objective that guides the programming of the resources allocated to individual entities under the programme and the overall strategy and criteria followed for implementation are:
 - (a) Objective. The objective is to support, through the transfer of knowledge and expertise, developing countries, least developed countries, countries with economies in transition and countries emerging from conflict in their efforts to develop the capacity to achieve internationally agreed development goals and the outcomes of United Nations conferences and summits;
 - (b) Strategy. The strategy to promote the above objective consists of:
 - (i) Responding to requests of Governments for urgent advice on policy-related issues;
 - (ii) Providing Governments with specific advice on sectoral matters relevant to their development strategies and programmes;

6 13-31175

- (iii) Assisting Governments in the formulation or evaluation of programmes and projects leading to the enhancement of national programmes;
- (iv) Developing networks of experts and practitioners in the respective sectoral areas to facilitate information-sharing, synergies and potential collaboration, especially through information and communications technology, workshops and seminars;
- (c) Criteria. The following criteria are relevant to all implementing entities of the programme:
 - (i) Activities should be responsive primarily to the requests of developing countries and be of a short-term nature (i.e. conceived and implemented within less than two calendar years); longer-term initiatives that require a phased approach and that build on knowledge acquired through previous interventions may continue, pending the mobilization of external resources;
 - (ii) Activities should fall within one of the priority areas of the implementing entity as mandated by its governing body, and the entity should play a demonstrable leadership role in normative and analytical functions related to the activities;
 - (iii) Activities should build capacity in developing countries, including for meeting treaty and related normative obligations, and, through the sharing of experience gained at the country level, enrich the analytical functions of the implementing entity for the benefit of all Member States;
 - (iv) Activities that aid in the preparation of specialized components of a country's development strategy or that help to prepare requests for larger-scale funding from other sources are encouraged.
- 23.18 Modalities used for the delivery of technical cooperation are intended to be flexible, utilizing those best suited to the specific objective being pursued, including but not limited to advisers, consultants, training, fellowships, distance learning, toolkits, knowledge networks and field projects.
- 23.19 Given the nature of the programme, its presentation in the proposed programme budget remains at the level of major sectoral themes with an indication of the entities responsible for implementation. At the same time, linkages with the biennial programme plan for the period 2014-2015 (A/67/6/Rev.1), indicating the relationship of the proposed activities to the relevant part of the biennial programme plan, are systematically provided at the subprogramme level.
- 23.20 Consistent efforts are made to incorporate results-based budgeting into the implementation of capacity-development activities funded under the regular programme of technical cooperation. The logical framework was initiated in the biennium 2004-2005 at the section level, expanded to the programme level in 2006-2007 and further expanded to the subprogramme level in 2008-2009 for each of the 52 subprogrammes that currently provide services under the regular programme of technical cooperation. Each subprogramme and, by extension, each related entity, is directly accountable for defining expected accomplishments, determining the appropriate indicators of achievement and, ultimately, achieving results.
- 23.21 The information contained in the present section of the proposed programme budget for the biennium 2014-2015 include: (a) expected accomplishments; (b) indicators of achievement, including benchmarks; (c) a budget summary; (d) an output summary; (e) more detailed information on activities, outputs, projects; and (f) an impact summary. In accordance with the request made by the Advisory Committee on Administrative and Budgetary Questions in its first report on the proposed programme budget for 2012-2013 (A/66/7) in that the impact summary be improved, the present section of the proposed programme budget attempts to define the results to

- be achieved within both the current and the future bienniums. The financial tables for the individual subprogrammes also reflect the actual expenditure data for 2010-2011, resources at revised rates for 2012-2013 and estimated requirements for 2014-2015 by object of expenditure.
- 23.22 Since the biennium 2006/2007, the achievements attained within the framework of the regular programme of technical cooperation have been reflected in the report on programme performance of the United Nations. The number of projects prepared, follow-up funding generated, conventions ratified and acceded to or reporting obligations met, and new legislation or policies adopted by the countries served, as well as implementation constraints, lessons learned from addressing them and knowledge gained from monitoring and evaluation were included in the programme performance reports (A/63/70, A/65/70 and A/67/70).
- 23.23 The first progress report on the regular programme of technical cooperation was submitted for the first time to the Advisory Committee on Administrative and Budgetary Questions in conjunction with the review of the proposed programme budget for the biennium 2012-2013. In its report A/66/7, the Advisory Committee requested that similar information be provided to it in advance of its consideration of the proposed biennial resource requirements for the regular programme of technical cooperation. The second progress report is hence being submitted in conjunction with the proposed programme budget for the biennium 2014-2015. The report is intended to illustrate and showcase the impact and results achieved by the implementing entities through their delivery of the programme.

Overview of resources

23.24 The overall resources proposed for the biennium 2014-2015 for this section amount to \$56,010,500 before recosting, reflecting a decrease of \$1,665,500 (or 2.9 per cent) compared with the resources for 2012-2013 at revised rates. The resource changes have been effected in accordance with General Assembly resolution 67/248.

Table 23.2 **Financial resources by component**

8 13-31175

Changes in line with General Assembly resolution 67/248

Resource changes of \$1,665,500 are proposed in line with General Assembly resolution 67/248. The primary areas of those reductions and related impacts are outlined in table 23.3 below.

Table 23.3 Resource changes in line with General Assembly resolution 67/248

Item	Net reductions in inputs	Description	Reductions in the volume of outputs	Reductions in performance targets
1	Department of Economic and Social Affairs			
	Reduction: General temporary assistance	Total net reduction: \$385,000 The number of advisory services that provide direct country-level assistance will be reduced. A 25 per cent reduction of the workforce in the subprogramme for sustainable development will have an impact on the formulation of new projects, fundraising initiatives and timely implementation of the subprogramme's existing capacity-development portfolio.	The number of advisory services would be reduced from 211 in 2012-2013 to 203 in 2014-2015. The number of seminars/workshops would be reduced from 78 in 2012-2013 to 69 in 2014-2015.	
2	UNCTAD			
	Reduction: General temporary assistance	Total reduction: \$74,100 The reduction will result in less resources for advisory services and will have an impact on the provision of country-specific policy advice and support for regional training courses.		_
3	UN-Habitat			
	Reduction: General temporary assistance	Total reduction: \$36,500 The number of technical advisory missions on urban development issues will be reduced.	-	_
4	UNODC			
	Reduction: General temporary assistance	Total reduction: \$45,200 There will be no short-term contracts for ad hoc advisory services; activities will be carried out by only two interregional advisers.	_	_

13-31175 **9**

Item	Net reductions in inputs	Description	Reductions in the volume of outputs	Reductions in performance targets
5	OHCHR			
	Reduction: Consultants Participants in seminars	Total reduction: \$109,400 The overall number of activities will not be reduced, but the regional react and scope of the activities will be reduced as will the participation of a number of key actors, such as governments, national human rights institutions and civil society stakeholders. This would reduce the access of national and regional actors to institutionalized human rights training and educational programmes. Reducing the number of participants would mitigate the impact. The provision of technical advice on contingency planning to be given to governments by the senior adviser will be limited to a period of 10 months in the second year of the biennium; in order to maintain performance and delivery levels, the organization will consolidate mission to locations that are near each other; also, the frequency of updating crisis contingency plans would be reduced. Total reduction: \$368,300 Taking into account the restructuring of the ECA programme of work and the reduction of a number of subprogrammes, it is not expected that the reduction would affect the provision of advisory services and	The number of participants in seminars would be reduced from 625 in 2012-2013 to 585 in 2014-2015.	
6	Office for the Coordination of Humanitarian Affairs			
	Reduction: General temporary assistance Travel of staff	The provision of technical advice on contingency planning to be given to governments by the senior adviser will be limited to a period of 10 months in the second year of the biennium; in order to maintain performance and delivery levels, the organization will consolidate missions		
7	ECA			
	Reduction: Travel of staff Fellowships, grants, contributions	Taking into account the restructuring of the ECA programme of work and the reduction of a number of subprogrammes, it is not expected that the reduction would affect the		

10 13-31175

Item	Net reductions in inputs	Description	Reductions in the volume of outputs	Reductions in performance targets
8	ESCAP			
8	Reduction: Consultants Travel of staff Fellowships, grants, contributions	Total reduction: \$176,400 The scale of activities would be reduced, which would affect the geographic scope of the remaining technical cooperation activities. The reduction will also result in less research and analytical work in preparing papers and background documents for workshops/seminars; reduced number and scale of projects; reduced capacity-building initiatives; reduced travel of staff to facilitate and lead regional discussions; and reduced capacity to respond to member States' requests. There will also be a reduction in the number and duration of capacity-building training workshops and seminars, as well as fewer beneficiaries from member States whose participation at those		
		workshops could have been accommodated by ESCAP.		
9	ECE			
	Reduction: General temporary assistance	Total reduction: \$111,600 The reduction will result in a decrease in the number of field projects.	The number of field projects would be reduced from 11 in 2012-2013 to 10 in 2014-2015.	-
10	ECLAC			
	Reduction: General temporary assistance	Total reduction: \$173,900 The proposed reduction would affect the capacity of ECLAC to conduct subregional activities, especially in the area of climate change mitigation and adaptation. The number of countries receiving assistance would be reduced.	The number of seminars/workshops would be reduced from 50 in 2012-2013 to 49 in 2014-2015.	

Part V Regional cooperation for development

Item	Net reductions in inputs	Description	Reductions in the volume of outputs	Reductions in performance targets
Item	ESCWA			
	Reduction:	Total reduction: \$153,300	_	_
	General temporary assistance	The reduction will result in shorter contracts for the Commission's regional advisers. The proposed reduction of general temporary assistance would result in fewer dedicated resource persons for regular programme of technical cooperation activities, affecting the depth of the expertise offered.		

The distribution of resources by component, object of expenditure and subprogramme is summarized in tables 23.2 to 23.5. A summary of outputs by implementing entity is provided in table 23.7.

^a The breakdown is subject to change in response to assistance requests received and is shown for indicative purposes only.

23.27 The requirements for sectoral advisory services amount to \$23,899,000, or 39.8 per cent of the total resources proposed under the present section, and cover the 17 sectors shown in table 23.8 above. It is anticipated that 708 work-months of interregional advisory services will be required during the biennium 2014-2015, compared with 792 work-months required during the biennium 2012-2013.

1. Economic and social affairs: \$13,563,200

23.28 The activities under economic and social affairs are implemented by the Department of Economic and Social Affairs in support of programme 7 of the biennial programme plan for the period 2014-2015 (A/67/6/Rev.1). More specifically, the Department's activities under the regular programme of technical cooperation will provide support for formulating national policies which integrate global conference outcomes at the country level, in particular in relation to the achievement of the internationally agreed development goals. In the biennium 2014-2015, the Department will focus

on assisting countries to better integrate social, economic and environmental policies and strategies to achieve inclusive and sustained economic growth, poverty eradication and sustainable development through capacity-development activities in the following five priority areas: (a) strengthening of statistical capacities; (b) sustainable development, including climate change mitigation and adaptation, particularly in the follow-up to the United Nations Conference on Sustainable Development in 2012; (c) public administration, information and communications technology (ICT) and development and e-government; (d) social integration and inclusion of vulnerable groups; and (e) policy advisory services on macroeconomic issues. The Department will work closely with the five regional commissions, Resident Coordinators and the United Nations Development Programme (UNDP) regional teams for effective coordination.

23.29 The Department will continue to pursue an integrated approach that brings together interrelated strands of work in each area to ensure synergy and appropriate interface, based on specific needs of country-level or intercountry cooperation and considering the support provided by other United Nations system organizations and partners. The Department brings countries together based on common needs, on shared platforms of learning, in order to exchange experiences in areas where capacity gaps have been identified and where the Department has comparative advantage. In selected countries, the Department collaborates with national authorities and partners in piloting models, innovative approaches, and instruments, and thus helps catalyse longer-term and larger scale interventions by other development partners.

	Actual 2010-2011	Estimate 2012-2013	Estimate 2014-2015	In 2012-2013, advisory services provided support in Armenia, Albania, Belarus, Nepal, the Republic of Moldova and Tajikistan to promote greater attention to issues related to ageing, disability, the family
Advisory services Seminars/workshops	24 5 (400)	30 9 (450)	32 13 (530)	and indigenous peoples, to strengthen awareness and increase social inclusion. National capacity- development workshops were organized in collaboration with United Nations country teams in Albania on ageing and social assessment, in Armenia on active ageing, in the Republic of Moldova on ageing
Total	29	39	45	and in Tajikistan on the Convention of the Rights of Persons with Disabilities. Regional workshops were organized in Ethiopia and Thailand. Approximately 200 persons received training during 2012, and a similar number is expected in 2013. The training increased their awareness of and capacities to implement policies and programmes to benefit particular social groups by providing them with information and practical skills for implementation in areas such as evidence-based policymaking, mainstreaming, participatory methodologies and use of logical frameworks. In the biennium 2014-2015, the subprogramme will aim at strengthening national capacities to design and implement social policies adjusted to the new dynamics in global economic and environmental trends that will promote achieving equitable social development and society for all.

Impact summary (2014-2015; 2012-2013)

In the biennium 2012-2013, the subprogramme assisted over 70 developing countries in taking stock of national sustainable development and in preparing for the United Nations Conference on Sustainable Development. During the biennium 2012-2013, the subprogramme will have organized 18 international capacity-building meetings/workshops on various sustainable development thematic issues, including energy for sustainable development and climate change and sustainable transport, as well as on tools for strengthening institutional capacities and integrated approaches in water resources management. Those interventions will strengthen the capacities of 1,715 national experts. Topics include policies and programmes that reach into rural areas without electricity, and help shift to access of goods and services through clean, safe, affordable transport systems and land use planning. Improved availability of data on energy use and energy intensity was applied in country energy indicators studies by eight additional countries. The subprogramme, through the provision of expert advice by its interregional advisers, has provided support to 22 countries in Asia and 9 in Latin America, which have joined regional declarations. An additional 30 are anticipated to join by 2015 with leveraging from multi-stakeholder partnerships, including the Partnership on Sustainable Low Carbon Transport, development banks and United Nations funds and programmes.

In 2014-2015, the subprogramme will support small island developing States in their review of implementation of the Mauritius Strategy for the Further Implementation of the Barbados Programme of Action for Sustainable Development of Small Island Developing States, including identifying gaps and challenges and also lessons learned and best practices that could be scaled up with a view to strengthening the capacity-building process. In line with the outcome of the United Nations Conference on Sustainable Development, the subprogramme will also support developing countries and countries with economies in transition to lay the ground work for the development of the green economy based on country-specific requirements. The subprogramme will contribute to support integrated water resources management, including strengthening data and information systems for water-related indicators through capacity-development tools based on the System for Environmental-Economic Account, including the subsystem for water, for improved integration, inclusion, implementation and coherence in national development planning. Awareness of the options for achieving greater access to energy services and their impact on sustainable development will continue to be raised, enabling authorities to improve knowledge of options for promoting access to modern energy services, including financing options. The subprogramme will continue to support sustainable transport in developing countries and countries with economies in transition, including through the regional environmentally sustainable transport forums where ministries of transport, health and environment come together for cross-learning and joint declarations on sustainable transport followed by periodic reporting on progress.

Part V

An estimated 15 workshops or seminars will be carried out during the biennium funded from the regular programme of technical cooperation, while the number of the fellowships in 2014-2015 is expected to be slightly lower than in 2012-2013. The subprogramme strategically links the resources from the regular programme of technical cooperation, with the Development Account to support capacity-building efforts in core areas of statistics.

In all its capacity-building efforts the subprogramme works closely with a number of partners at the national, subregional and regional levels. At the national level, the subprogramme's counterparts are the national statistical offices. At the subregional and regional levels, the subprogramme works extensively with subregional economic entities (the Caribbean Community (CARICOM), the South African Development Community (SADC), the Economic Community of West African States (ECOWAS), etc.) as well as with the United Nations regional commissions. Depending on the subject matter, partnerships are also forged with United Nations specialized agencies as well as funds and programmes (the International Labour Organization (ILO), the United Nations Children's Fund (UNICEF), the United Nations Population Fund (UNFPA), UNEP, the United Nations Industrial Development Organization (UNIDO), UNCTAD, the World Trade Organization (WTO), etc.). The global coordination of statistical capacitybuilding efforts is also regularly discussed at the Committee for the Coordination of Statistical Activities, of which the United Nations Statistics Division (UNSD) is the permanent secretariat.

Impact summary (2014-2015; 2012-2013)

In 2012-2013, the subprogramme is expected to further the development of sustainable national statistical and geospatial systems with appropriate governance structure, the use of state-of-the-art data capture, processing and dissemination technologies for enhancing quality and access to policy-relevant statistical information. With the organization of the workshops and the provision of fellowships, the subprogramme aims at providing methodological guidance and transferring professional knowledge and skills to national statisticians in key statistical areas.

In the biennium 2014-2015, following the adoption by the Statistical Commission of the relevant international statistical standards, the subprogramme will aim at strengthening the regular and sustained production of policy-relevant indicators for the Millennium Development Goals, as well as demographic and social statistics, including gender statistics, environment and energy statistics, and national accounts, and on building the capacity and infrastructure for the compilation of the environmental-economic accounting.

Output summary (partice	ipants)			Impact summary
	Actual 2010-2011	Estimate 2012-2013	Estimate 2014-2015	Given that the subprogramme initiated its capacity-development work in the area of international tax cooperation for the first time in 2012 and that the new version of the United Nations Model Convention
Advisory services Seminars/workshops	- -	11 2 (40)	9 5 (100)	was finalized in 2012, a major part of the activities and resources was used for developing the tools necessary to conduct training in this area. The training materials comprise three sets, namely: (a) United Nations Course on Double Tax Treaties; (b) United Nations Course on the Practical Application of Double
Total	-	13	14	Tax Treaties; and (c) United Nations Course on Double Tax Treaty Negotiation. The first, basic course introduces the fundamentals of tax treaties and provides participants with a good understanding of the United Nations Model Convention. The work on developing the first course will be finalized in 2013, and the first regional training event will be held in November 2013. It is expected that in 2014-2015, with the completion of the initial set of training materials a programme of seminars will be in place, which will result in enhanced capacities of tax officials in developing countries in four regions (Africa, Latin America and the Caribbean, Asia-Pacific and CIS) to negotiate, administer and interpret tax treaties, drawing on the United Nations Model Convention.

2. Trade and development: \$2,540,900

23.30 The activities in this sector are implemented by the United Nations Conference on Trade and Development (UNCTAD) in support of programme 10, Trade and development, of the biennial programme plan for the period 2014-2015. They focus on: (a) the provision of technical advice on policy options and their implications as well as opportunities for technical assistance in trade, investment and related areas, drawing mainly on mandates and policy issues provided in the Accra Accord and the Doha Mandate; (b) the provision of training for Government officials and policy practitioners on key issues on the international economic agenda with a view to increasing their capacity to build more effective and integrated policy responses to a changing global economy, as mandated in paragraph 166 of the Bangkok Plan of Action and subsequently reconfirmed by the Sao Paulo consensus and the Doha Mandate; and (c) policy advice, technical support and policy coordination of the assistance provided in the context of the enhanced integrated framework for trade-related technical assistance to least developed countries among the six relevant agencies (UNCTAD, WTO, the International Trade Centre, UNDP, the World Bank and IMF).

				The activities of interregional advisers are embedded in the operational programmes of the main subprogrammes of UNCTAD. In the period 2012-2013, under subprogramme 1, UNCTAD provided country-specific policy advice emanating from regular research and analysis work of the subprogramme, in particular the annual UNCTAD flagship <i>Trade and Development Report</i> , as requested by policymakers in Asia, Latin America and West Africa. Short advisory missions were fielded in 2012 to Dakar to assist officials of the Banque Centrale des Etats de l'Afrique de l'Ouest in the elaboration of a joint UNCTAD/Banque Centrale training programme on macroeconomic management, economic integration and monetary policy. Such activities have helped to strengthen the capacity of senior administrators and policymakers to formulate appropriate economic policies and strategies that are supportive of sustained growth and poverty reduction and to participate more effectively in various multilateral negotiations. Five training courses are scheduled for the biennium 2014-2015.

Impact summary

In 2012, three regional courses were organized, in Belgrade (economies in transition in July 2012), Rabat (Africa) and Muscat (Western Asia). A total of 66 participants, 22 of which were women and 16 were from least developed countries, took part in the programmes. The courses paid particular attention to regional and national specificities, the exchange of experience among participants and policy simulation exercises that allowed participants to understand the practical implications of interlinkages among different policy issues. Responses received from the post-course evaluation of the twenty-second regional course conducted in Colombia in July 2011 revealed that: (a) participants reflected that there had been a noticeable improvement of their knowledge of international economic issues after attending this regional course, particularly trade policy issues and strategies for economic growth, the international financial structure, industrial policy and foreign direct investment; (b) participants also reported that they were able to apply this knowledge, particularly in their analysis and reporting of international economic matters, writing policy papers and providing advice to colleagues and working groups; and (c) there had been recognition of their contribution within their departments, and some had assumed greater responsibilities owing to the knowledge gained at the course. Three regional courses are planned in 2013 for the regions of Africa, Asia and the Pacific, and Latin America and the Caribbean. Five course deliveries are scheduled for the biennium 2014-2015.

The activities of interregional advisers are embedded in the operational programmes of the main subprogrammes of UNCTAD. In the period 2010-2012, under subprogramme 2, advisory services were provided to Latin American countries in the preparation of reports to the Group of 20 Development Working Group on promoting standards for responsible investment in value chains and on indicators for measuring and maximizing economic value added and job creation arising from private sector investment in global value chains, through which an estimated two thirds of international trade passes. An adviser supported the development of the testing phase of the indicators in five pilot countries and oversaw their implementation. Piloting of the indicator framework through country case studies (in Bangladesh, Cambodia, Dominican Republic, Lao People's Democratic Republic, Mongolia and Mozambique) along selected value chains has confirmed their practicality and user-friendliness for governments, who can use the framework with a view to attracting more jobs and maximizing value added in targeted value chains/value chain segments.

^a Activities organized jointly by subprogrammes 1, 2, 3 and 4 are indicated under subprogramme 1.

Total	14	23	18	bilateral aid donors in examining their assistance strategy for the least developed countries. Consistent with the programme's target, a total of eight countries, namely Benin, Cape Verde, Central African Republic, Democratic Republic of Congo, Gambia, Madagascar, Mozambique and Senegal, benefited directly from activities related to the operationalization and implementation of the Enhanced Integrated Framework through technical field missions and in-country workshops during 2010-2012. Regular programme of technical cooperation resources were used to assist with updating the diagnostic trade integration studies with a view to integrating the most recent developments in trade and trade policies into the analysis and with drafting technical cooperation projects for the implementation of the action matrix of the diagnostic trade integration study, particularly with regard to the formulation of tier 2 projects, to		
				be funded by the Enhanced Integrated Framework Trust Fund. The update of the Gambia diagnostic trade integration study has been finalized, while the updating of the diagnostic trade integration study for Senegal is under way. The updating of the diagnostic trade integration study for Mozambique, already approved by the Enhanced Integrated Framework Trust Fund, will be carried out in 2013. Moreover, in recognition of its work, UNCTAD has been requested by several countries to act as lead agency to carry		

out the update of the diagnostic trade integration studies within the Enhanced Integrated Framework.

3. **Human settlements: \$1,350,100**

- 23.31 The activities in this sector are implemented by the United Nations Human Settlements Programme (UN-Habitat) in support of programme 12, Human settlements, of the biennial programme plan for the period 2014-2015. The programme offers technical expertise and operational support to requesting governments and other Habitat Agenda partners through: (a) short-term advisory services on strategically selected, high priority issues; (b) identification, development and launch of innovative and illustrative cooperation programmes; and (c) specialized support to the implementation, monitoring and replication of such cooperation programmes.
- 23.32 The aim is to support governments and other Habitat Agenda partners in their efforts to meet their commitments and make their contributions to the implementation of the Habitat Agenda, other internationally agreed development goals and the human settlements dimension of other multilateral agreements such as the Millennium Development Goals, and the conclusions of the United Nations Conference on Sustainable Development. In addition, substantive inputs will be provided to the preparation of the Third United Nations Conference on Human Settlements and Housing to mainstream high priority issues related to sustainable urbanization into national preparatory processes.

Technical advice will be rendered to Member States to prepare the CIS Urban Forum and State of CIS Cities report, to be developed in 2014-2015.

4. International drug control, crime and terrorism prevention and criminal justice: \$1,593,900

- 23.33 Activities in this sector are implemented by the United Nations Office on Drugs and Crime (UNODC) in support of programme 13, International drug control, crime and terrorism prevention and criminal justice, of the biennial programme plan for the period 2014-2015. The programme provides advisory services and technical support to developing countries, countries in transition and post-conflict countries in: (a) acceding to and implementing international instruments on drug and crime control; (b) strengthening and reforming their criminal justice systems; and (c) developing new national and regional action plans against drugs and crime as well as innovative national responses and programmatic action to combat the threat of organized crime.
- 23.34 The programme is designed to respond rapidly to requests for assistance from Member States, with a particular focus on the least developed countries, post-conflict States and States in transition, and provides such assistance through: the provision of advisory services (in relation to both substantive justice and enforcement matters and related policy, strategy and programmatic advice); the training of criminal justice policymakers and professionals in specialized areas; and the conduct of expert workshops and meetings, as well as of missions to assess specific country needs and engage in the subsequent design of longer-term technical assistance programmes.

Output summary (partic	cipants)			Impact summary
	Actual 2010-2011	Estimate 2012-2013	Estimate 2014-2015	In the biennium 2012-2013, advisory services provided by the programme have directly contributed to the ratification of the three drug control conventions, the United Nations Convention against
Advisory services	50	60	60	Transnational Organized Crime and the United Nations Convention against Corruption. Advisory services have also facilitated the development of integrated regional and country programmes.
Seminars/workshops	16 (800)	16 (800)	16 (800)	Consequently, in 2014-2015, activities and resources will support the effective implementation of the
Fellowships	20	20	20	Conventions (given the high number of ratifications achieved), including the strengthening of criminal justice institutions to fight serious and organized crime. For the 2012-2013 cycle, with support from this
Total	86	96	96	programme, new extrabudgetary projects of more than \$10 million have been already developed, with fundraising still ongoing. The regular programme of technical assistance cooperation resources in 2014-2015 will complement increased extrabudgetary-funded action in criminal justice and drug control matters and also distribute to more Member States the tools developed for improved training, such as the Criminal Justice Handbook series, which has aimed at preparing criminal justice officials and senior policymakers to respond effectively to serious crime. Thus, in 2014-2015 resources for training will further increase the number of justice and enforcement officials that have been trained in recent years, in synergy with extrabudgetary-funded regional and country programmes. Advisory services and field project design will focus on young democracies, post-conflict countries and countries in transition, which are the most vulnerable to the impact of illicit trafficking and organized crime, in the areas of crime prevention, criminal justice, rule of law, transnational organized crime and illicit trafficking, including drug trafficking, countering corruption, combating drugs and HIV, and other UNODC-mandated areas. Those services will build upon expert workshops, assessment and programming missions conducted between 2011-2013 to the Governments of Benin, Guinea-Bissau, Myanmar and Yemen, in Central America, West Africa and countries in the North Africa-Middle East region, and the provision of advice to government officials, United Nations country teams and potential partners on integration of their drug and crime control elements into joint development assistance action.

5. Human rights: \$3,753,300

23.35 Activities in this sector will be implemented by the Office of the United Nations High Commissioner for Human Rights (OHCHR), in support of subprogramme 3, Advisory services, technical cooperation and field activities, of programme 20, Human rights, of the biennial programme plan for the biennium 2014-2015. The programme of advisory services in the field of human rights was established pursuant to General Assembly resolution 926 (X) of 14 December 1955. At the request of Member States, technical assistance is provided in the form of: (a) advisory services; (b) global, regional and national technical cooperation projects; (c) conferences, seminars, workshops and group training; (d) fellowships; and (e) documentation and information as they relate to both advisory services and technical cooperation. The objective of those activities is to cooperate with countries in efforts to strengthen the implementation of international human rights standards at the regional and national levels, including through assistance to requesting States, support to national plans and capacity-building for human rights promotion and protection.

Total	123	149	149	In 2014-2015, the subprogramme will support: (a) the provision of expert advice to support national capacity-building in the field of human rights and the strengthening of cooperation between the United Nations and regional arrangements in the field of human rights, including through the work of regional offices; (b) the provision of expert advice through holding consultation missions with governments and participation in meetings and missions to promote system-wide coordination of human rights activities and cooperation with regional organizations; (c) the holding of three workshops per region per biennium, and the provision of support to regional stakeholder dialogues to allow government representatives, as well as representatives of national human rights institutions and of civil society, to discuss human rights issues that require a regional approach and initiative; and (d) the provision of 40 fellowships to give individuals belonging to indigenous groups and national institution fellows the opportunity to gain knowledge and skills in the field of international human rights.	

6. Humanitarian assistance: \$1,113,600

23.36 The activities in this sector are implemented by the Office for the Coordination of Humanitarian Affairs in support of programme 23, Humanitarian assistance, of the biennial programme plan for the period 2014-2015. The programme will provide advisory services and training to promote natural disaster reduction and to facilitate the smooth transition from emergency relief to rehabilitation and development; to develop and promote common policy on humanitarian issues for the United Nations system and its partners; to mobilize and coordinate assistance in complex emergencies; and to mobilize and coordinate assistance for disasters. The Office for the Coordination of Humanitarian Affairs will continue to contribute to strengthening and developing national capacities, developing and enhancing national emergency plans in post-disaster emergency situations, and promoting the standardization of language and procedures in national contingency planning in disaster-prone and emergency-affected countries.

Output summary (parti	Output summary (participants)			Impact summary		
	Actual 2010-2011	Estimate 2012-2013	Estimate 2014-2015	During 2010-2011, inter-agency contingency plans were prepared or updated in a total of 64 countries. These included subregional preparedness strategies containing contingency planning		
Advisory services	18	20	22	elements for a number of countries. Among the 27 countries with a designated Humanitarian Coordinator, at least 24 either developed or revised their inter-agency contingency plans during the reporting period.		
Seminars/workshops	4	8	8	In 2012-2013, efforts to emphasize the institutionalization inter-agency contingency planning are		
Total	22	28	30	continuing. While 2010-2011 focused on the wide dissemination of related guidance and training materials to all local, national and regional humanitarian partners, in 2012 regional workshops on emergency response planning and simulation exercises were organized in Southern and western Africa.		
				Building upon this stream of work from previous bienniums, the subprogramme will contribute to strengthening the capacity of governments to review, develop and enhance national contingency plans and to promote the standardization of procedures in national or joint contingency planning in disaster-prone and emergency-affected countries. Based on experiences from the biennium 2012-2013, special focus in 2014-2015 will be put on supporting the development of harmonized and synchronized nations contingency plans to ensure an effective and optimal response capacity/preparedness for crisis with regional dimension. Best practices on planning are being collected, documented and shared among different countries/regions and preparedness/contingency planning networks.		
				It is envisaged that advice and support will be provided on strengthening response capacity depending on request received from country teams, governments or regional organizations (e.g., Sahel crisis regional response). The IASC Sub-Working Group on Preparedness is in the process of defining an emergency response preparedness approach, including contingency/response plans and minimum preparedness measures. It will continue to support emergency response capacity development under the common Framework with IASC, the United Nations Development Group and the United Nations Office for Disaster Risk Reduction under development.

Fellowships	2	2	2	As an effort to build and strengthen regional partnerships during 2012, the Office for the Coordination of Humanitarian Affairs supported the ASEAN Regional Workshop on Environmental
Total	22	22	22	Emergencies. The workshop was a key step in implementing the strategic partnership between the Office for the Coordination of Humanitarian Affairs and the regional organization. The outcomes, which include a two-year workplan to strengthen national/regional capacities in environmental emergency response, enhanced national-level coordination between disaster management and environmental authorities. The workshop not only built impetus for similar initiatives with other regional organizations and Member States, but also raised awareness of regional and global mechanisms to respond to environmental emergencies.
				In 2014-2015, assistance will be provided in the preparation and implementation of training courses focusing on harmonization of emergency response capacity assessment and coordination approaches as well as in the dissemination and implementation of established standards and recognized procedures. A series of technical workshops will be organized to build on information-sharing and knowledge networks among affected countries.

^a Subject to change in response to assistance requests received; shown for indicative purposes only.

- 23.37 The estimates for this component amount to \$36,075,600, or 60.2 per cent, of the total resources proposed under this section. In accordance with General Assembly resolution 2803 (XXVI) of 14 December 1971, provision is made for a system of regional and subregional advisory services for the purpose of assisting developing countries that are members of the regional commissions in solving problems that they may encounter in their national development efforts. The advisory services are made available in response to requests from Governments and involve advisory missions on an individual or joint multidisciplinary basis. The resources for regional and subregional advisory services are provided in the form of work-months estimated to meet the requirements in particular fields during the biennium. The regional advisers are engaged on a temporary basis and receive support from substantive divisions and administrative services of the regional commissions.
- 23.38 It is anticipated that 936 work-months of regional advisory services will be required in the biennium 2014-2015, compared to 1,128 work-months required during the biennium 2012-2013.

1. Economic and social development in Africa: \$14,344,700

- 23.39 Activities in this area are implemented by the Economic Commission for Africa (ECA) in support of programme 15, Economic and social development in Africa, of the biennial programme plan for the period 2014-2015. During the biennium, the activities of ECA under this programme will be geared towards strengthening the capacity of member States and their development organizations in formulating and implementing appropriate policies and programmes for achieving the internationally agreed development goals, including the Millennium Development Goals, and the priorities of the New Partnership for Africa's Development (NEPAD). Efforts will be coordinated to ensure an appropriate balance between regional and subregional activities, with priority assigned to the needs of the regional economic communities and the African Union and its NEPAD programme. The programme will also support operational activities at the country level in the context of the work of the United Nations country teams in line with General Assembly resolution 67/226 on the quadrennial comprehensive policy review.
- 23.40 In 2014-2015, capacity development and technical cooperation activities under the regular programme of technical cooperation will follow the main policy priorities of ECA, which is focused on providing capacity-building support to member States in selected priority areas that correspond to the areas of its research focus and where its comparative strength and expertise is

13-31175

widely acknowledged in order to add value and make impact on the development prospects of its member States. In this regard, ECA will leverage its expertise in providing cutting-edge policy advisory and other capacity-building services to its member States, focusing on the following high priority areas: macroeconomic policy; industrialization; development planning; and natural resources. The capacity-building needs in some of those and other emerging areas will be met through short-term expertise, taking advantage of the cutting-edge knowledge and innovations available on the continent.

2. Economic and social development in Asia and the Pacific: \$6,276,700

23.41 The activities in this area are implemented by the Economic and Social Commission for Asia and the Pacific (ESCAP) in support of programme 16, Economic and social development in Asia and the Pacific, of the biennial programme plan for the period 2014-2015. During the biennium 2014-2015, technical cooperation activities will target the advancement of technical, managerial and organizational capacities in the developing and least developed member and associate member States of ESCAP. Those efforts will be geared towards planning and delivering more effective policies and programmes, particularly in support of the achievement of the Millennium Development Goals and outcomes of other United Nations conferences and summits, including the follow-up to the United Nations Conference on Sustainable Development. The capacity-development activities will cover a broad scope, including: societal and organizational transformation; policy-level impact and sustainability; creation of space for and management of dialogues, relationships and partnerships; and knowledge networks.

Impact summary

On macroeconomics-related capacity-building, the subprogramme organized policy dialogues in over 20 capitals, helping national policymakers and other target groups to translate the key policy analysis and recommendations identified at the regional/subregional levels to their respective national circumstances. Given the growing interest among member States, the Division plans to expand the dialogues to 30 capitals in the current and next biennium.

On the least developed countries, the subprogramme organized key capacity-building events before, during, and after the adoption of the Istanbul Programme of Action at the Fourth United Nations Conference on the Least Developed Countries, held in May 2011. They were targeted at policymakers and civil society organizations from the 13 least developed countries in the region, and helped identify and address major gaps in implementing the Istanbul Programme of Action, including in the areas of human and social development and mobilization of financial resources. Training courses, advocacy workshops and other activities in the current and next biennium are expected to further strengthen national capacities.

On sustainable agriculture, the subprogramme has organized, through the Centre for Alleviation of Poverty through Sustainable Agriculture, several workshops and training and research activities to help agricultural policymakers and researchers share and adapt best practices as well as develop and utilize statistical and other tools. Those activities are helping countries to address food insecurity and rural poverty.

(a) Enhanced knowledge and increased capacity of ESCAP member States to develop and implement transport policies and programmes	(a) Increased number of government policies, programmes and initiatives that reflect transport-related principles or recommendations promoted by ESCAP 2010-2011: 69 Estimate 2012-2013: 80 Target 2014-2015: 90	Capacity development will continue to revolve around the nine thematic areas identified in the Regional Action Programme for Transport Development in Asia and the Pacific, phase II (2012-2016), which include: (a) transport infrastructure development; (b) transport facilitation; (c) transport logistics; (d) finance and private sector participation; (e) sustainable transport development; (f) road safety; (g) transport and the Millennium Development Goals; (h) inter-island shipping; and (i) connecting subregional transport networks. Key delivery modalities will include: (a) professional advisory services to be provided in response to requests from governments, particularly the least developed countries, landlocked developing countries and small island developing States, through skilled in-house and short-term external expert services; and (b) training/workshops at the national, subregional and regional levels to develop capacity towards reaching the development and implementation of sustainable transport-related policies on transport facilitation, logistics, international integrated intermodal transport connecting the Asian Highway Network, the Trans-Asian Railway Network and dry ports of international importance, road safety, and public-private partnerships for infrastructure development and affordable and economically feasible inter-island shipping services. It should be noted that regular programme of technical cooperation			
(b) Increased capacity of ESCAP member States and the private sector to plan and develop international intermodal transport linkages, including the Asian Highway Network, the Trans-Asian Railway Network and dry ports of international importance	(b) Number of national projects and programmes to upgrade regional transport infrastructure, including the Asian Highway Network, the Trans-Asian Railway Network and dry ports of international importance 2010-2011: 55 Estimate 2012-2013: 65 Target 2014-2015: 70				
(c) Increased capacity of ESCAP member States and the private sector to implement measures to improve the efficiency of international transport operations and logistics	(c) Increased number of initiatives to remove non-physical bottlenecks and facilitate the efficient movement of people, goods and vehicles along transport routes and at border crossings	funds will be especially important for supporting the implementation of the intergovernmental agreement on dry ports, which is expected to be adopted by ESCAP at its sixty-ninth session, in 2013, as well as the Regional Strategic Framework on the Facilitation of International Road Transport, which was formulated and adopted by the Ministerial Conference on Transport. Regular programme of technical cooperation funds will be used to assist Myanmar in establishing a sustainable training system for the logistics industry, a need identified during advisory services. In this regard, the subprogramme will continue to collaborate closely with key United Nations agencies, intergovernmental organizations, subregional organizations, non-governmental organizations and other collaborating institutions active in inclusive and sustainable transport in Asia and the Pacific, as well as with existing cooperation mechanisms, including the United Nations Special Programme for the Economies of Central Asia.			oted by egic
	2010-2011: 18 Estimate 2012-2013: 24 Target 2014-2015: 30				es e Vations , active in with

				Moreover, regular programme of technical cooperation funds will support subregional initiatives, including follow-up to the Agreement between the governments of the Shanghai Cooperation Organization member States on Facilitation of International Road Transport. In collaboration with the ESCAP Pacific Office, regular programme of technical cooperation funds will be used to enhance the capacity of Pacific island countries to provide efficient, reliable and affordable shipping services to, from, between and within the island and archipelagic developing countries.					
Output summary (partic	ipants)	<u>.</u>		Impact summary					
	Actual 2010-2011	Estimate 2012-2013	Estimate 2014-2015	Since the adoption of the Intergovernmental Agreement of the Shanghai Cooperation Organization Member States on Facilitation of International Road Transport in 2008, the regular programme of					
Advisory services	4	6	11	technical cooperation funds of ESCAP (sect. 23) have continued to play an important role in the					
Seminars/workshops	4	4	20	preparation and finalization of the annexes to the agreement. That Agreement is aimed at facilitating the movement of freight transport by road between the member States of the Shanghai Cooperation					
Total	8	10	31	Organization, namely, China, Kazakhstan, Kyrgyzstan, the Russian Federation, Tajikistan and Uzbekistan, and as such will become a critical step in the operationalization of the Asian Highway Network. During the biennium 2010-2011, the secretariat provided advisory services to government officials on the various issues involved, as well as technical assistance in organizing one consultation meeting and the third Negotiating Meeting on Draft Annexes to the Agreement between the Governments of the Shanghai Cooperation Organization Member States on Facilitation of International Road Transport. Those annexes describe the operational arrangements for the implementation of the Agreement and cover several sensitive and complex issues, such as control measures at border crossings. Thanks to those efforts, the annexes to the Agreement have been finalized and are expected to be signed by the respective member States in the near future. Over the bienniums 2012-2013 and 2014-2015, this approach will be extended to other subregions to gradually achieve regional harmonization.

3. Economic development in Europe: \$3,820,100

23.42 Activities in this area are carried out by the Economic Commission for Europe (ECE) secretariat in support of programme 17, Economic development in Europe, of the biennial programme plan for the period 2014-2015. Technical cooperation activities will be carried out in countries with economies in transition in Eastern Europe, the Caucasus, Central Asia and South-East Europe with the view to improving their national capacities to formulate and implement ECE and international legal instruments, norms and standards. The activities will also promote regional integration and cooperation, in particular on transboundary issues, and will support national efforts to achieve the internationally agreed development goals, including the Millennium Development Goals.

4. Economic and social development in Latin America and the Caribbean: \$6,196,400

23.43 The activities in this area are implemented by the Economic Commission for Latin America and the Caribbean (ECLAC) in support of programme 18, Economic and social development in Latin America and the Caribbean, of the biennial programme plan for the biennium 2014-2015. The objectives of the programme will be to enhance the technical capacity of policymakers to design, formulate, implement and evaluate new policy alternatives, to strengthen their knowledge and understanding of issues affecting economic and social development, and to support the incorporation of new tools and methodologies in the monitoring of economic, social and environmental trends in the framework of the internationally agreed development goals. Particular emphasis will be placed on supporting countries in consolidating measures and policies to achieve progress towards meeting the internationally agreed development goals towards 2015, in particular those derived from the Millennium Declaration and the 2005 World Summit and Outcome Document and those emanating from the negotiations on the development agenda beyond 2015 and the sustainable development goals.

Total	20	30	34	this area will continue in 2013 and into the next biennium. Technical assistance has also been provided to Colombia and Mexico on the implementation of indicators for corporate governance. This technical assistance will be extended to Argentina, Chile and Peru in 2013. As of 2013, the subprogramme will select six ECLAC member countries to provide technical assistance relating to the internationalization of small- and medium-sized enterprises.	
				For the biennium 2014-2015, the subprogramme anticipates an increase to 10 countries that implement ECLAC recommendations as a result of capacity development in the areas of trade policy, climate change-related aspects of international trade and internationalization of small- and medium-sized enterprises. This will in turn increase the demand for: adequate technical assistance to develop instruments in the areas of trade policy; adjustments to carbon emission standards for export products; and data collection, innovation and trade finance instruments to enhance the internationalization of small- and medium-sized enterprises. There will also be an increase of the technical capacity-building programmes provided to Latin American and Caribbean countries to improve their linkages with the global economy, and in particular with the dynamic Asia-Pacific region.

Total	22	24	26	cost of hunger in Africa study will be launched in the first quarter of 2013 with a specific methodology for Africa, and that the adapted methodology will be implemented in eight additional countries. The experience of the study was highlighted among the resolutions and decisions adopted by the Conference of African ministers of Finance, Planning and Economic Development, which was held in March 2012. In terms of progress made towards achieving the Millennium Development Goals, it is important to mention the agreement to cooperate in the advancement of studies to analyse the costs of obesity was achieved among government representatives from Argentina, Aruba, the Dominican Republic, Ecuador and Uruguay.
				During the biennium 2014-2015, it is expected that at least six countries will have strengthened their technical capacities by using ECLAC proposals and models to manage and classify social expenditure and to improve the design of and monitor and evaluate current social policy issues and new challenges. It is also expected that six other countries will have enhanced their capacities to evaluate and analyse the results of social programmes in relation to the achievement of Millennium Development Goal 1 and post-2015 commitments of the United Nations.

During 2012-2013, this support continues: policymakers and technical staff from Latin America and the Caribbean are receiving capacity-building advice on the economics of climate change and on vulnerability, risks and impacts of a rise in sea level to develop adaptation policies. Several requests have been received for in-depth technical assistance on adaptation in coastal areas. Colombia and Guatemala will have increased their capacity to carry out socioeconomic impact assessments of extreme natural events to formulate risk reduction strategies as part of the natural disasters assessment undertaken in the biennium. In relation to the integration of sustainability criteria in development policies and measures, technical assistance is ongoing with seven countries of the region. All those activities will be reinforced in the biennium 2014-2015 in line with the outcomes of the United Nations Conference on Sustainable Development, the post-2015 agenda and the needs of the region in relation to climate change.

	Actual 2010-2011	Estimate 2012-2013	Estimate 2014-2015	During 2012-2013, ECLAC will continue to provide technical assistance to respond to requests from member States related to natural resources and infrastructure. New efforts are being implemented in order
Advisory services	10	12	14	to advance towards a regional coordination of different sectoral policies. In particular, the subprogramme
Seminars/workshops	3 (45)	4 (60)	4 (60)	will organize capacity-building workshops to promote the use of energy efficiency indicators into sectoral policies, including transportation. This will promote cross-sectoral interventions and take advantage of
Fellowships	2	1	1	synergies in the subprogramme.
Field projects	2	1	2	It is expected that the scenario for the biennium 2014-2015 will be favourable to advancement in the
Total	17	18	21	development of comprehensive policies for sustainable natural resources, energy efficiency and infrastructure services. Moreover, with adequate funding activities and synergies with other initiatives, it could be possible to advance towards subregional coordination policies as a result of the political will and commitments made in the Community of Latin American and Caribbean States, where ECLAC will have a role as a policy adviser. These initiatives would in turn increase the demand for adequate technical assistance in the areas of logistics and physical infrastructure integration. Funds provided in this subprogramme as well as funds from the Development Account, for example, for a recent project entitled "Logistics integration for the sustainable exploitation of natural resources in Latin America and the Caribbean", whose objectives are synergic with this subprogramme in promoting policy improvements (including technical and economic regulations) would be used for the promotion of a more equitable and sustainable physical integration in the region. The Natural Resources and Infrastructure Division estimates that at least four countries are willing to include the recommendations of ECLAC in the coordination of policies on regional infrastructure services.

Output summary (participants)				Impact summary
	Actual 2010-2011	Estimate 2012-2013	Estimate 2014-2015	In 2012-2013, the subprogramme supported member countries in the subregion in the identification of the main economic restrictions to achieving high-level and equitable growth. As the global crisis
Advisory services	123	104	106	continued, the subregional headquarters assisted countries in the subregions in identifying
Seminars/workshops	9 (225)	6 (180)	2 (90)	macroeconomic challenges (monetary, fiscal, financial and macroprudential) and options to take into account in the preparation of their national macroeconomic policies. On the social front, the
Fellowships	4	4	4	subprogramme supported the implementation of the Central American social integration strategy; and the
Field projects	2	2	4	subprogramme developed various proposals for strengthening national capacities for the design and
Total	138	116	116	implementation of social policies linked to regional integration. In collaboration with the Central American Social Integration Secretariat, ECLAC-Central American Social Integration Secretariat support and follow-up on the implementation of the recommendations at the national and subregional levels will continue in 2013. The subprogramme will also continue to advise some member countries in the subregion (El Salvador, Guatemala and Mexico) on industrial and innovation policies towards the development of integrated approaches for the insertion of small- and medium-sized enterprises into global value chains. Moreover, following the successful experience in supporting Nicaragua in the development of its national plan for science, technology and innovation, the subprogramme played an essential role in the transfer of good practices, in particular in managing innovation in small- and medium-sized enterprises; building capacity among support institutions and creating a supply of qualified technicians in innovation management in small- and medium-sized enterprises. The subprogramme will continue to provide advice and support to national and subregional initiatives for energy integration and to assist member countries in their efforts towards meeting the goals of the Central American Sustainable Energy Strategy 2020 (countries in the subregion made notable progress in the increased use of renewable energy). The subprogramme will support member countries in the introduction of the use of natural gas, the use of sustainable firewood and of clean stoves, as well as advance the regulatory frameworks to adopt energy efficiency, which are central to mitigating greenhouse gas emissions and very useful in reducing energy bills. The subprogramme will continue to promote South-South cooperation among its member countries following the example of the cooperation between the National Institute for Statistics and Geography of Mexico and the Haitian Institute for Statistics in the development of an indicator of economic activity.

23.44 The activities in this area will be implemented by the Economic and Social Commission for Western Asia (ESCWA) in support of programme 19, Economic and social development in Western Asia, of the biennial programme plan for the period 2014-2015. In the biennium 2014-2015, activities will focus on strengthening the technical, managerial and organizational capacities of developing member countries to plan and deliver more effective policies and programmes, particularly in support of the Millennium Development Goals and the outcomes of the major United Nations conferences. The programme will also address the emerging needs of the least developed countries and countries emerging from conflict. Special attention will be placed on identifying, testing and supporting the adoption and adaptation of good practices, as well as knowledge-sharing in the areas of water and energy, social policies, globalization, and information and communications technology.

Impact summary

In the biennium 2012-2013, member countries benefited from the capacity-building tools presented by ESCWA in the form of training workshops, advisory services or fellowships in the thematic areas of productive sectors, water resources management and energy.

For the biennium 2014-2015, the subprogramme will further work on developing appropriate mechanisms to strengthen the interface between the subprogramme's normative work and the operational needs of governments at the country level with regard to energy, water resources and the productive sectors. Member countries will benefit from the capacity-building tools presented by ESCWA that address issues such as: green economy for sustainable development and poverty eradication; institutional framework for sustainable development; efficiency measures in the industrial sector; water supply and sanitation; and integrated water resources management and management of shared water resources.

^a Indicative; subject to beneficiary requests.

Subprogramme 2. Integrated social policies

Output summary (participants)				Impact summary
	Actual 2010-2011	Estimate 2012-2013	Estimate 2014-2015	In 2012-2013, the subprogramme is providing a number of technical advisory services on improving the collection and production of disability data, enhancing strategic planning capacity,
Advisory services	15	30	40	rationalizing social protection programmes, reforming labour market policies, in addition to providing assistance to the Libyan Forum for Civil Society and the Ministry of Human Rights in Yemen.
Seminars/workshops/ study tours	1 (21)	1 (25)	2 (32)	Furthermore, training workshops are being organized on national reporting on the implementation of the Convention on the Rights of Persons with Disabilities, mainstreaming youth and migration issues into development planning, in addition to organizing the high-level meeting on social reform and
Field projects	1	_	_	transitions to democracy and a regional conference on social protection and development.
Total	17	31	42	In 2014-2015, the subprogramme will continue to provide advisory services aimed at enhancing national capacity in areas of social protection, integrated social policy, employment generation, civic engagement and participation, and other emerging social issues. In this respect, it is anticipated that the number of new policies in the areas of social protection, employment generation and the integration of persons with disabilities will increase from four in 2012-2013 to six in 2014-2015. Likewise, it is expected that the number of official statements expressing commitment to mainstream migration issues into development planning will increase from one in 2012-2013 to three in 2014-2015. Technical assistance is also expected to contribute to increasing the number of countries reporting progress in the development of national plans of action on migration and development, from one in 2012-2013 to three in 2014-2015. The subprogramme will contribute significantly to laying strong foundations for civic engagement and participation in Libya and Yemen through the use of consensus-building toolkits and manuals. It is expected that the number of countries engaged in similar initiatives would increase to four by 2014-2015, with the support of ESCWA.

Seminars/workshops	2 (96)	3 (60)	4 (48)	The subprogramme will contribute to improve understanding of opportunities and challenges f the national, subregional and regional levels for implementing the Regional Plan of Action and the A	
Total	13	33	32	ICT strategy for developing the information society, building a knowledge-based economy and promoting regionally harmonized cyberspace. Special attention will be given to: building governmental capacity, especially in the least developed country (Yemen) and countries emerging from conflict (Iraq, Lebanon and the Occupied Palestinian Territory), in order to bridge the digital divide between the Gulf Cooperation Council and other ESCWA member countries; increasing understanding and improving the skills of national offices on ICT impact indicators and means for measurement, monitoring and reporting for policymaking; promoting the harmonization of cyberlegislation, encouraging a knowledge-based economy, implementing policies and plans of action to enhance the ICT sector, and improving the provision of ICT applications and e-services for achieving the Millennium Development Goals and the target of the World Summit on the Information Society. The subprogramme will also contribute to strengthening networking and knowledge-sharing through building communities of practice in the areas of ICT policymaking, digital Arabic content, cyberlegislation, Arab Internet governance, ICT for socioeconomic development and others, and ensure the effective use of ICTs at the national and regional levels.
