

## README file: Public review of CII based on CCTS v3 and NDR v3

### Introduction

Welcome to the readme file for the public review of the first Cross Industry Invoice (CII) based on the first Core Component Library using CCTS 3.0. This file provides a summary of how this CII was produced, what the review package contains, and how you can comment on it.

### Background

The migration of CII is derived from the published CII version 2.00.05. The corresponding published BRS is unchanged. The corresponding RSM document (version 2.0.08) is used to develop a new RSM version based on the new template for RSMs.

After extensive work by the Library Maintenance team as well as project members from the Cross Industry Invoice migration team converting it to CCTS 3.0, harmonization of the results, and quality assurance, the result is now available for public review.

### Contents

This review package contains the following files:

1. This readme file.
2. The CII RSM document.
3. The CII schema.
4. A blank comment log for the CII RSM document.
5. A blank comment log for the CII Schema.

### Public Review Process

You can comment on the RSM document or the CII schema or both.

All comments should be submitted to Chris Hassler ([chris.hassler.ctr@dcma.mil](mailto:chris.hassler.ctr@dcma.mil)) with a copy to Karina Duvinger ([karina.duvinger@gs1.se](mailto:karina.duvinger@gs1.se)) not later than the date posted by the Secretariat.

Comments received will be used to improve both the deliverables as well as the processes used to produce them.
