Solicitation of Comments on the Draft Specifications for Application of UNFC to Wind Energy Resources

The UNECE Expert Group on Resource Management (EGRM) is pleased to present for public comment the draft document “Specifications for the application of the United Nations Framework Classification for Resources (UNFC) to Wind Energy Resources”. Growing awareness and interest in renewable energy resources, including wind energy resources, has highlighted a need to standardize how renewable energy potential is classified and reported. Consistent reporting of wind energy resources will aid policy formulation, national and corporate resources management and provide a comparable basis for financing energy projects.

The inclusion of Wind Energy Specifications within UNFC will facilitate the appreciation of the potential role that wind energy in particular, and renewable energy in general, could play in the energy sector. The draft specifications provide definitions and descriptions of key concepts and resource categories and aims to clarify how the UNFC principles and the generic renewable energy specifications could be applied to wind resources. Generic examples of how wind project resources can be estimated are also provided in the draft specifications with corporate, investor and national resource assessments in mind.

The public comment period will be open from 21 May until 21 July 2019. Comments may be provided via e-mail and all comments will be posted to the UNECE website. Full details are available on the UNECE website at: www.unece.org/energy/se/reserves.html.

Sincere appreciation is extended to the members of the EGRM Wind Energy Sub-group for their efforts in preparing the Specifications and Mr. Markus Klingbeil is thanked for leading this initiative as Chair of the Sub-group. Appreciation is also extended to the Renewable Energy Working Group for its oversight of this work under Mr. Frank Denelle’s leadership.

Yours sincerely

Markus Klingbeil
Shell and
Chair, EGRM Wind
Energy Sub-Group
