**ENVIRONMENTAL IMPACT ASSESSMENT**

**1588-ПЗ-ОИ4**

**PART 8**

**EIA REPORT**

**Part 8.2. Current condition of environment**

**EXPLANATORY NOTE**

**(06.07.2010 version)**

Director

Rykov A. N.

Deputy Director

Bobrov V. V.

Chief Project Engineer

Strelkov A. I.

## Contents

Designation	Nomination	Page
	13 Characteristic of environment	6
	13 .1 Geological environment	6
	13.1.1 General characteristic of geomorphologic peculiarities, geological and structural tectonic Framework	6
	13.1.1.1 NPP 30-km safety area	6
	13.1.1.2 NPP site	10
	13.1.2 Analysis of existing and predictable negative endogenous and exogenous processes and phenomena	17
	13.1.2.1 NPP 30-km safety area	17
	13.1.2.2 NPP site area	22
	13.1.3 Seismic behavior analyses	22
	13.2 Chemical and radioactive pollution	25
	13.2.1 Surface Water	25
	13.2.1.1 Quality of water according to physical and chemical analysis	25
	13.2.1.2 Field work data	34
	13.2.2 Radiation situation	37
	13.2.3 Surface water and bottom sediments	37
	13.2.4 Soil	39
	13.2.4.1 Technogenic pollution	41
	13.2.4.2 Radioactive contamination	42
	13.2.5 Soil generalization according to radioactive nuclides migration intensity in typical soils of Ostrovets land	46
	13.2.5.1 Soil generalization according to migration intensity of <sup>137</sup> Cs	47
	13.2.5.2 Generalization of soil by migration intensity of <sup>90</sup> Sr	49
	13.2.6 Atmosphere	52
	13.2.6.1 Chemical contamination	52
	13.2.6.2 Radiation situation	52
	13.3 Meteorological and aerological conditions	54
	13.3.1 Meteorological conditions	55
	13.3.1.1 Insolation condition	55
	13.3.1.2 Air temperature	56
	13.3.1.3 Soil temperature	57
	13.3.1.4 Atmospheric humidity	58
	13.3.1.5 Cloudiness	58

Designation	Nomination	Page
	13.3.1.6 Atmospheric precipitation	59
	13.3.1.7 Snow cover	62
	13.3.1.8 Evaporation	63
	13.3.2 General atmospheric circulation	63
	13.3.2.1 Wind regime (in accordance with the data from surface observations)	65
	13.3.2.2 Wind regime (according to the data from high-level observations). Wind rose at 100, 200, 300 and 500 m	71 76
	13.3.3 Categories of atmospheric stability	80
	13.3.4 Strong wind, squalls, whirlwinds	80
	13.4 Surface waters. Quantity and qualitative characteristics	83
	13.4.1 Provisional scheme of water drain, water supply and water discharge of Belarusian NPP. Alternatives.	83
	13.4.2 Current state of surface water	87
	13.4.2.1 Hydrographic characteristics within 30-km area of NPP's site	87
	13.4.2.2 Direction and intensity of change of condition of the structure of the drainage-area	93
	13.4.3 Drain characteristic of water objects	94
	13.4.4 Level and velocity mode characteristics	98
	13.4.5 General characteristics of winter conditions	100
	13.4.6 Bed sediments and characteristics of channel processes	101
	13.4.7 Water quality according to hydrochemical parameters and its integrated assessment	103
	13.4.8 Environmental state of the main watercourses and water reservoirs	107
	13.4.9 Thermal regime of water objects	107
	13.4.10 Water users and consumers	108
	13.4.11 Protected areas of water objects	108
	13.5 Assessment of aquatic ecosystems within the 30-km area of the Belarusian NPP	109
	13.5.1 Aquatic ecosystems condition within the 30-km area of nuclear power plant	109
	13.5.2 Structural organization of biotic communities	116

Designation	Nomination	Page
	13.5.2.1 Phytoplankton	116
	13.5.2.2 Zooplankton	118
	13.5.2.3 Periphyton	119
	13.5.3 Water quality and ecosystem state assessment by hydrobiological indicators	120
	13.5.4 Springs	123
	13.6 Groundwater. Assessment of current state	126
	13.6.1 Hydrogeochemical map	126
	13.6.2 Existing anthropogenic pollution	128
	13.6.3 Usage	129
	13.6.4 Ground water protection	132
	13.6.4.1 Protection assessment criteria	132
	13.6.4.2 <sup>137</sup> Cs and <sup>90</sup> Sr migration parameters	133
	13.6.4.3 Protection from radioactive contamination	134
	13.7 Soils. Agriculture. Risk assessment of radiation exposure on agricultural ecosystems	136
	13.7.1 Risk assessment of radiation exposure on agricultural ecosystems. Purposes and objectives	136
	13.7.2 General mechanisms of radionuclide intake	136
	13.7.3 General agricultural plant characteristics of Belarusian NPP, made using materials of surveying works at the stage of site selection	138
	13.7.4 Radioecological assessment of current condition of agricultural ecosystems and agricultural production	139
	13.8 Landscapes, flora, fauna	140
	13.8.1 Landscapes	140
	13.8.1.1 Landscape potential	140
	13.8.1.2 Landscape pollution resistance	141
	13.8.2 Natural greenery structure	144
	13.8.3 Protected plant species	147
	13.8.4 Specially protected natural areas (SPNA), protected forests, valuable plant complexes	148
	13.8.5 Fauna	149
	13.8.5.1 Ground invertebrata	149
	13.8.5.2 Ichthyofauna	149
	13.8.5.3 Toadfish- and herpetofauna	151
	13.8.5.4 Bird fauna	151
	13.8.5.5 Hunting species	152

Designation	Nomination	Page
	13.9 Population and demography	158
	13.9.1 Demographic situation within the 30-km area of the Belarusian NPP	158
	13.9.2 Comparative analysis of primary disease incidence of adult population in Grodno, Vitebsk and Minsk Regions of the Republic of Belarus in 2004-2008.	159
	13.9.3 Comparative analysis of primary disease incidence in of children and adolescents (0-17 inclusively) in Grodno, Vitebsk and Minsk Regions of the Republic if Belarus in 2004-2008.	162
	13.9.4 Analysis of primary malignant neoplasms of population in Grodno, Vitebsk, Minsk regions and separate districts of these regions of the Republic of Belarus in 2004-2008.	164
	13.10 Historical and cultural heritage of the Ostrovets District	167
	13.11 Summary	169
