Subject: CHAP (2010) 00645

Attached decisions relates to correspondence to this file of 28/4/2010 relating to statements published in the name of University College Dublin (UCD), a public body and Ireland's largest university, in the Irish Media.

Attached is the Decision of the Commissioner for Environmental Information, which clearly shows that UCD were engaged in disseminating false information, indeed in the case of the Corrib pipeline, the statements made were outright abusive and designed to inflame the situation against those of us who were working on the project. These decisions are published later on the Commissioner's website: <http://www.ocei.gov.ie/en/DecisionsoftheCommissioner/>. However, the Commissioner's powers are limited solely to granting of access to information and do not relate to dissemination of information. Clearly these false statements to the media were designed to (a) generate funding in wind energy research and (b) advance a Green agenda that was abusive to those of us completing the necessary infrastructure of the State and acting outside the Environmental Acquis.
