

# Wood energy in the ECE region

Activities by the secretariat and preliminary results from  
JWEE 2015

FORESTS

**39<sup>th</sup> Joint UNECE/FAO Working Party on Forest Statistics,  
Economics and Management**  
29-31 March 2017, Geneva

# Planned activities by the secretariat

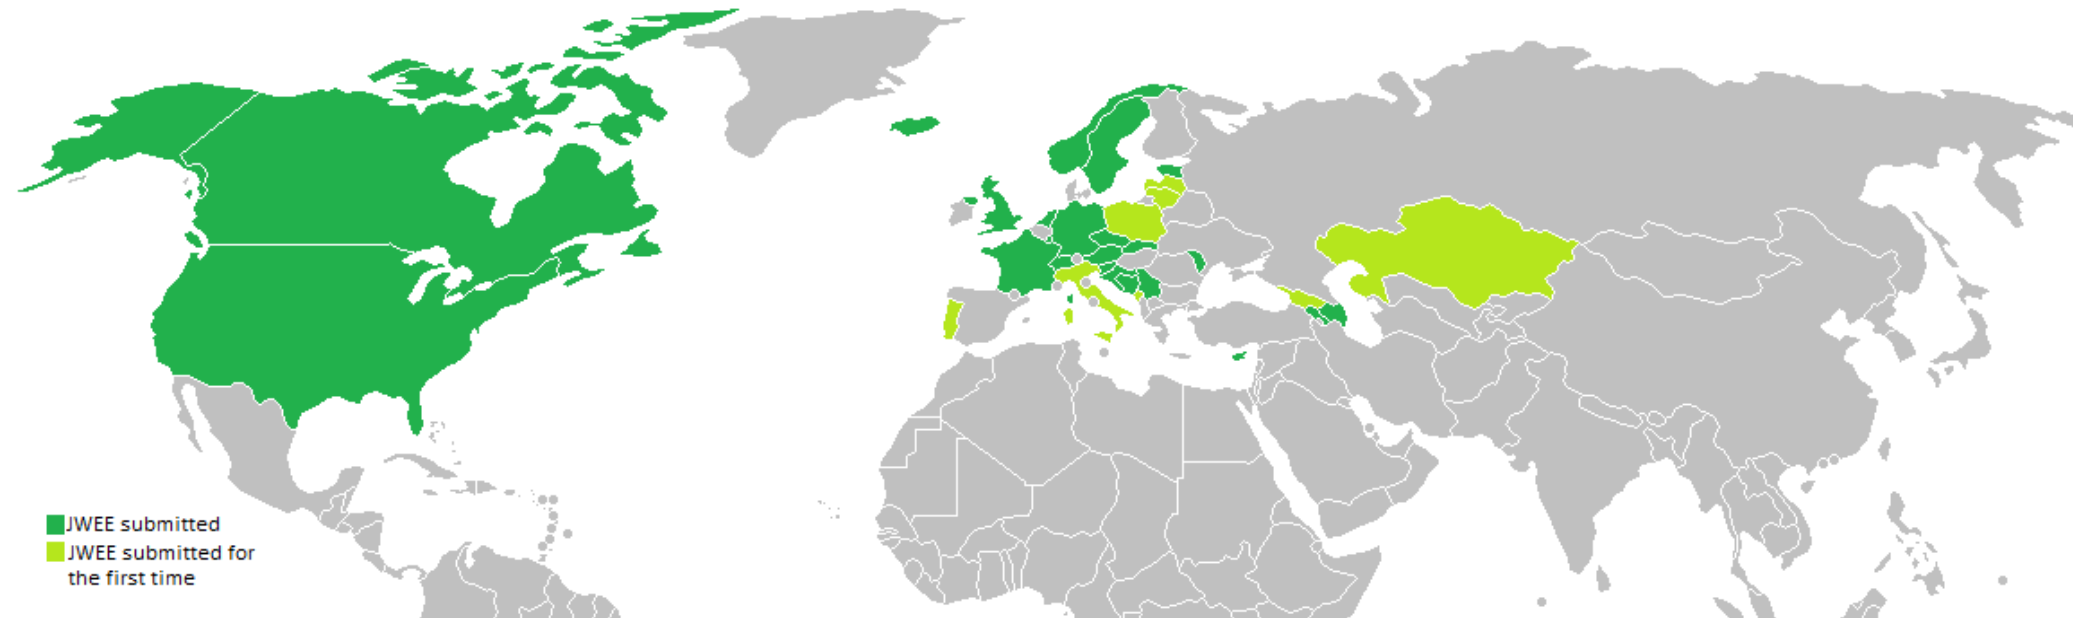

## FORESTS

- Promote the film *“More heat with less wood”* in other languages
- Chapter on wood energy in the FPAMR
- Finalization of publication on “Wood energy in the ECE region”
- Cooperation with relevant organizations
- Finalization of JWEE 2015 data assessment

# Map of reporting countries JWEE 2015

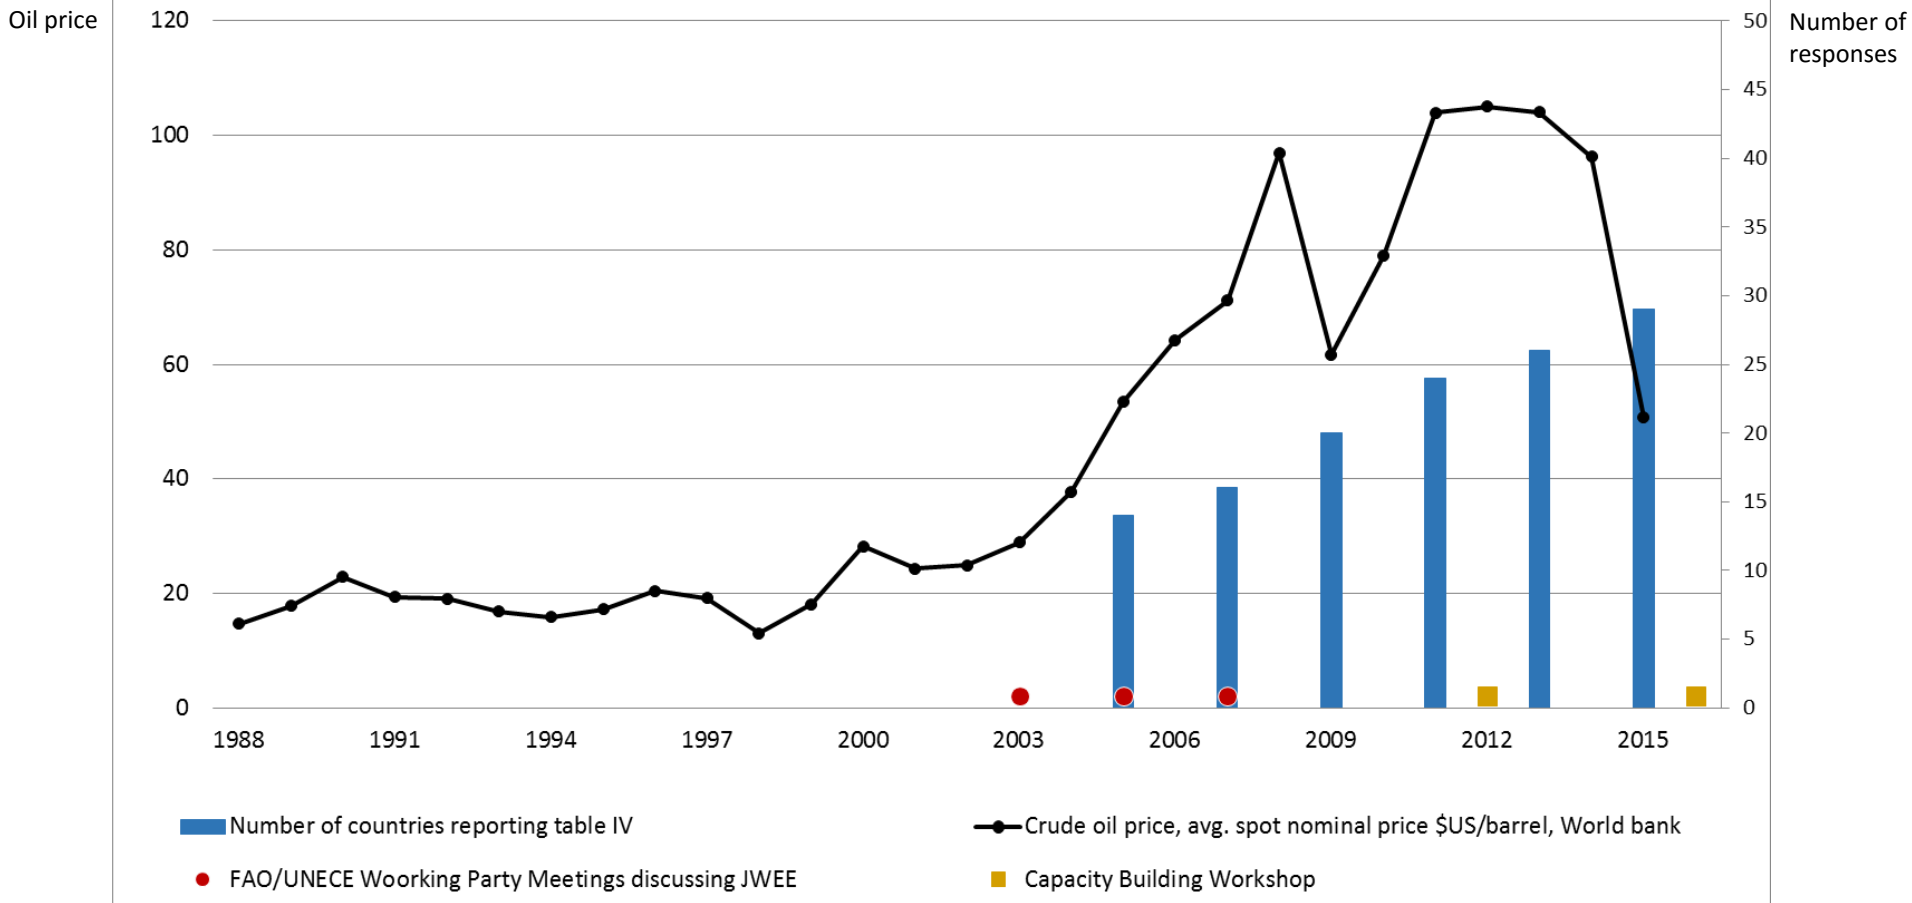

FORESTS

as of March 2017

# Response rate

## FORESTS

\*as of March 2017

# Responses

## FORESTS

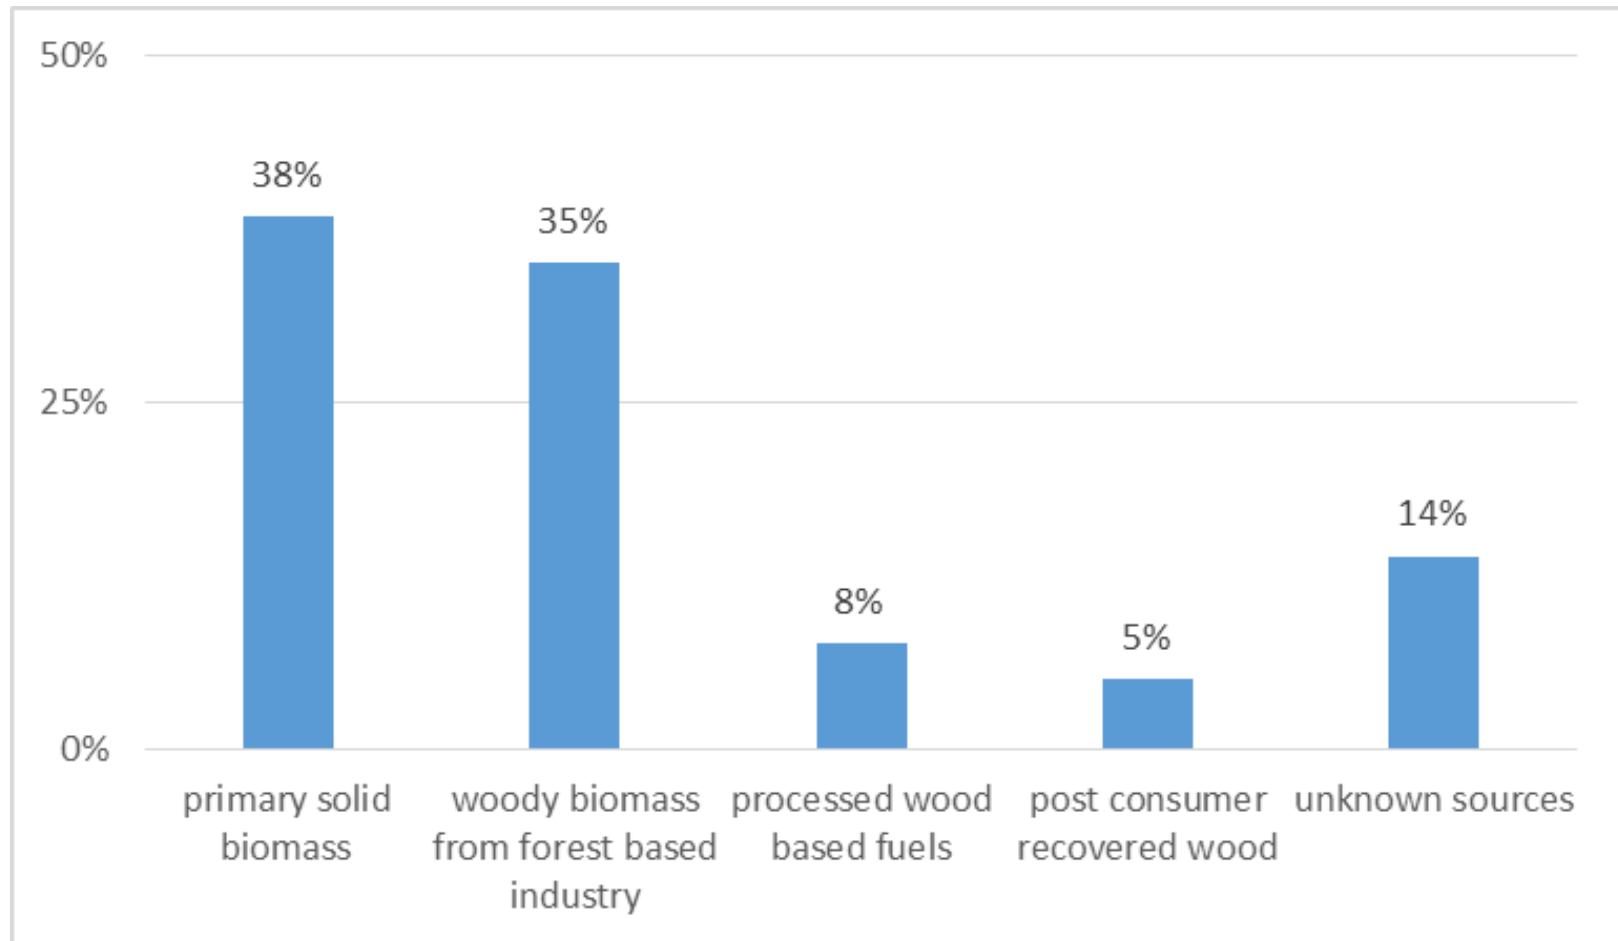

Origin of wood for energy	Share of member states reporting figures
Primary solid biomass	93%
Wood from forest based industry	89%
Post consumer recoved wood	39%
Unknown origin	18%

Wood energy consumer	Share of member states reporting figures
Main Activity Producer	71%
Forest based industry	93%
Residential Sector	93%
Other sector	75%

## FORESTS

# Results: Pellet trend

## FORESTS

in  
mio. m<sup>3</sup>

Trend for Austria, Cyprus, France, Germany, Luxembourg, Serbia, Slovenia, Sweden and United Kingdom

- Aligning data with energy statistics?
  - Better cooperation with IEA, Eurostat and IRENA in ToS on wood energy
- Providing results in a Flat-File only?
- Provide wood energy conversion factors?
- Provide updated manual?
- Russian-language version of outputs?

# III. Wood Energy

## D. Key questions on data assessment for guidance and discussion

### FORESTS

Delegates are invited to:

- a) Comment on the JWEE and issues that arise in completing the questionnaire.
- b) Review the work of the Team of Specialists and provide suggestions for improvements.

# Thank you!
