Setting the Scene – The Journey

Our story is about a Journey.

A company in the country of Arganda (the destination country) has ordered a cargo of industrial supplies from the producers in a nearby country, Banda (the origin country).

Banda → **Ruritainia** → **Arganda**

origin country transit country destination country

To get the supplies to their destination, the lorry needs to cross another country, Ruritainia (the transit country). The Ruritainian government has recently been a focus of attention at the WTO and the UN and is working to improve its out-of-date Customs Procedures.

The WCO opened a new e-learning course for transit at the CLiCK platform in May 2016.

Transit of Goods – Risk Management, Customs Seals, Coordinated Borders & Performance Measurement

> Risk Management

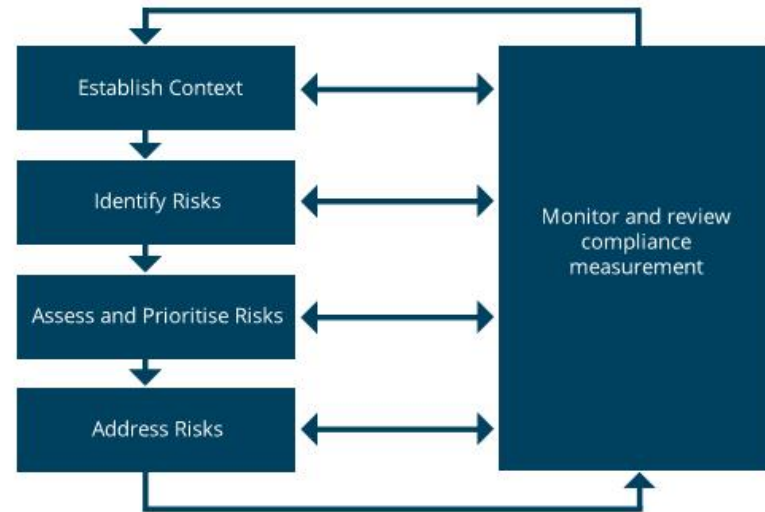

Overview

I have compiled some of the information from the Revised Kyoto Convention on risk management into a presentation. I'll show it to you before I show it to Aamira.

Firstly, we need to consider Risk Management an **ongoing process**.
