

Informal document No. **WP.29-147-15**
(147th WP.29, 10 - 13 March 2009,
agenda item 8.7.)

International Workshop on International Standards to Promote Energy Efficiency and Reduce Carbon Emissions

Takao Onoda
International Energy Agency
Takao.onoda@iea.org

World Forum for Harmonization of Vehicle Regulations (WP.29), 10-13 March

Outline of the workshop

Location and date

- OECD Conference Centre, Paris: 16-17 March 2009

Organizer

- This workshop will be jointly organized by the IEA, ISO and IEC.

Background

- For effective public policy and private sector actions to promote energy efficiency, it is essential to establish internationally recognized energy efficiency test procedures and methodologies to define and measure energy efficiency.
- While much energy efficiency standardization work has already been done, a great deal still remains to do.
- This workshop brings together leading policymakers, standardization professionals and key private sector actors to discuss how to accelerate progress in energy efficiency standardization.

Goals and outcomes

- This workshop explores the key technical, policy and administrative themes pertaining to energy efficiency standardization in all energy usage sectors including transport sector.
- This workshop also aims to animate discussion and draw conclusions that can be fed into relevant high-level international processes including:
 - ◆ 2009 G8 Summit in Italy
 - ◆ UNFCCC's COP-15 meeting in Copenhagen
 - ◆ International Partnership for Energy Efficiency Cooperation (IPEEC)

Request to WP.29

- WP.29 has been playing the most important role in making test procedures and regulations for road transport sector.
- Therefore the IEA would like to invite a WP.29 representative to give a presentation in the session of "ENERGY EFFICIENCY OF TRANSPORTATION".

Thank you for your attention.
