

I. Proposal for Supplement 5 to the 03 series of amendments to Regulation No. 95 (Lateral collision)

Annex 5, Appendix 3, shall be deleted

II. Justification

GRSP adopted in 2002 at its thirty-first session the 02 series of amendments to UN Regulation No. 95 (TRANS/WP.29/GRSP/2002/6, proposed by EEVC), introducing the EEVC mobile deformable barrier (MDB) face specification. However, from the result of the discussion it was not clear that the existing Appendix to Annex 5, "Examination of the mobile impact barrier" had to be deleted. TRANS/WP.29/GRSP/2002/6 proposed an amendment of Annex 5 and the adding of two additional appendices but did not indicate whether or not the existing appendix should be removed.

Actually, most of the provisions of the characteristics of the barrier of the former Appendix (now Appendix 3) had been incorporated in Annex 5. However, doubt remains if Appendix 3 should remain for any examination purposes of the Type Approval Authority, responsible for the mobile deformable barrier.
