English

20 January 2017

Joint Meeting of Experts on the Regulations annexed to the European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways (ADN) (ADN Safety Committee)**Thirtieth session**

Geneva, 23 - 27 January 2017

Item 4 (c) of the provisional agenda

Implementation of the European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways (ADN): interpretation of the Regulations annexed to ADN

Transport of UN2057 Tripropylene**Submitted by CEFIC**Related document: INF20 of 29th session**I. Introduction**

1. With regard to the request submitted by CEFIC in the last ADN Safety Committee in August 2016 about the amendment of UN 2057 Tripropylene entry in Table C of ADN – Informal Document 20 already discussed, we would like to make the following proposal to ship this product as soon as possible in deviation from table C of ADN in tank vessels appropriately based upon the environmental classification **under GHS** (instead of column 5 Table C) of this product as aquatic toxicity acute category 1

II. Proposal

2. The ADN Safety Committee might discuss and confirm, that new subsection 2.1.2.8 ADN may be used in combination with paragraph 7.2.1.21.4 ADN analogously for Table C of ADN to

- Assign the product with “N1” instead of “N3” in the transport document
- Affirm the use of a tank vessel type C instead of type N closed.

III. Justification

3. The new subsection 2.1.2.8 ADN is a provision harmonized for ADR/RID/ADN. We are of the opinion that by amending ADN for 2017 it has been overlooked that only in ADN there are additional provisions in table C which have to be taken into account as well.

4. With regard to Note 2 of subsection 2.1.2.8 ADN CEFIC will cooperate with the competent authority to provide the mentioned proposal for an amendment of Table C for UN 2057.

5. To amend table C we request the Safety Committee to authorize the Working Group “substances” with that task.
