SPECA Workshop on Transport related Sustainable Development Goals (SDGs)

**Rixos President Hotel Astana, Kunaeva 7
Astana, Kazakhstan
2-3 November 2017**

The Sustainable Development Goals (SDGs) are a universal call to action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity. They are a universal set of goals, targets and indicators that UN member States will be expected to use to frame their agendas and policies until 2030. The 17 Global Goals with 169 targets are contained in United Nations Resolution: Transforming our world: the 2030 Agenda for Sustainable Development (A/RES/70/1) of 25 September 2015. The SDGs follow and expand on the millennium development goals (MDGs), which were agreed by UN member States in 2001.

One of the main UNECE goals is to assist member States in implementing the Sustainable Development Goals (SDGs) by translating global goals into legal instruments, norms, standards, and recommendations.

The aim of the Workshop is to strengthen the transport-related SDG knowledge of SPECA and East-Europe countries. As such, the workshop will help participants understand how the SDGs affect their day-to-day business and how they can benefit from the activities related to the SDGs. The workshop will allow attendees to connect SDGs achievement with national transport policies, and give them information on the statistical tools to accurately measure and monitor SDGs implementation. A key aspect of the workshop will be the exchange of information and experiences of the participants in relation to gathering information for, and reporting on, the SDGs.

DRAFT AGENDA

2 November 2017

13.30 - 14.00 Registration

14.00 – 14.30 Welcome/ Opening speech

Mr/Ms, Deputy Chairman of Road Committee, Ministry of Investment and Development, Kazakhstan

Mr. Nenad Nikolic , UNECE
