Transportation Asset Management

Information Resource Center

Welcome

This website provides a gateway to information and resources pertaining to advancing the state of the art and state of the practice in asset management.

This site is part of TRB's Information Resource Center series, which is made up of more than 200 websites that highlight information on a particular topic area from a broad range of sources that are referenced in or accessible from TRB's website. Most Information Resource Center webpages address topic areas covered by a specific TRB Technical Activities Division Standing Committee or Task Force.

Transportation Asset Management Today

Welcome to The Transportation Asset Management Today website, the knowledge site sponsored by the AASHTO Subcommittee on Transportation Asset Management! Visit the topic areas below and enjoy the experience. Click on any of the topic area names to join a discussion in progress, initiate a new discussion, or check out the reference documents and links. For regular email updates about each topic, fill out the "e-Mail Notification" form accessible above. Once registered, you will receive daily notification of any new reference materials or discussion topics posted in your areas. You also have the option of including your name in the site's growing directory.

Accelerating Infrastructure Innovations

FOCUS

April 2014

INSIDE

- 2 Rock solid: Rockeries offer context-sensitive slope solutions
- 4 Protecting transportation investments with risk-based asset management
- 5 Participate in the LTPP warm-mix asphalt study
- 5 USDOT publishes notices of proposed rulemaking
- 6 Infrastructure innovation webinars
- 7 Highway technology calendar
- 8 FHWA offers highway friction tester demonstrations

Accelerating Infrastructure Innovations: Goodbye *Focus*, Hello *Innovator*

From Superpave to high-performance concrete (HPC) to prefabricated bridge technologies, *Focus* has always been about accelerating infrastructure innovations. At its beginning in 1997, that meant chronicling the groundbreaking work of the Strategic Highway Research Program (SHRP). This was followed by comprehensive coverage of SHRP technology implementation efforts. Pavement preservation strategies, anti-icing techniques, HPC pavements and bridges, and the growth in Superpave use nationwide were among the featured technologies resulting from SHRP's success.

After SHRP implementation ended in 2000, *Focus* continued to report on the real-life experiences of States using SHRP products, but coverage also expanded to include a broader range of infrastructure-related developments. Asset management, accelerated bridge construction, highway materials innovations, work zone safety improvements, and advancements in long-term bridge performance are just some of the technologies that have shared the *Focus* spotlight since then. Recent years have also featured a new millennium's crop of innova-

tions resulting from SHRP2 and the Federal Highway Administration's (FHWA) Every Day Counts (EDC) initiative.

This issue is the last *Focus*. But FHWA's *Innovator* newsletter will continue to report on the latest in highway innovation topics. Dedicated to "Accelerating Innovation for the American Driving Experience," recent *Innovator* topics have included warm-mix asphalt, smart work zones, and the geosynthetic reinforced soil integrated bridge system. All *Focus* subscribers will receive the electronic version of *Innovator*, though subscribers not interested in continuing to receive the publication will, of course, be able to opt out. To check out past issues of the *Innovator*, visit www.fhwa.dot.gov/hll/innovator. FHWA's SHRP2 Solutions (www.fhwa.dot.gov/shrp2) and EDC (www.fhwa.dot.gov/everydaycounts) Web sites are also your current go-to spots for the latest in highway infrastructure advancements.

Say goodbye to *Focus* this month, but with the help of FHWA's many other technology resources, continue to say hello to the innovations that are reinventing America's highways and bridges both for today and well into the future.

State Highway Asset Management Plan 2012-2015

This plan describes the services that our state highway system provides now and in the future, how we intend to manage the assets we use, and how we intend to fund the work that is needed.
