# 1. OBJECTIVE

This project aims to standardize business process and information entity of cross-industrial electronic tendering.

In various industries all over the world, there are all sorts of tendering action being performed including public procurement of construction works, service and goods. With an explosive spread of the Internet and a rapid growth of information technology, tendering activity would be performed electronically through the Internet as well as other business activities. With the realization of electronic tendering through the Internet and spreading practice of international electronic tendering, the needs for international standardization are thought to increase. According to such trends, the goal of this project is to make business process and information entity within tendering activities standard.

## 2. Definition of terms

This is a glossary of terms to be used in the international standard Electronic Tendering.

This is based on the terms and definitions of UN/EDIFACT CONITT/CONTEN message, the descriptions of UN/EDIFACT TDID and EDICON Tender Messages Documentation.

This is also based on existing Core Components and UN/CEFACT eBusiness Glossary.

Terms which are not defined or described in the above materials would be referred to WTO Agreement on Government Procurement and the other publications in worldwide use such as FIDIC and so on.

This would be revised as the progress of the project and be expected to be a material for final documents of the project.

The priority to be based on or referred to is as follows.

- 1-Definitions in Core Components
- 2-Definitions in UN/EDIFACT CONITT/CONTEN Message
- 3-Definitions in EDICON Tender Messages Documentation
- 4-Definitions in UN/EDIFACT TDID
- 5-Definitions in UN/CEFACT eBusiness Glossary
- 6-Descriptions in WTO Agreement on Government Procurement
- 7-Descriptions in Publications of FIDIC (International Federation of Consulting Engineers)
- 8-Descriptions in the other documents
