A. Interconnection of national customs systems with the eTIR international system

10. TIRExB took note of the presentation by the secretariat on the outcome of the Group of Experts on Conceptual and Technical Aspects of Computerization of the TIR Procedure (WP.30/GE.1), in particular at third and the last session that took place on 13–15 September 2021. that WP.30/GE.1 could not agree on one issue regarding the level of detail to be provided by holders about the itinerary and that it recommended transmitting this issue to the Technical Implementation Body (TIB), established as per Article 58 quater of the Convention.

11. Further, TIRExB welcomed latest developments in the eTIR international system and in the eTIR data model, based on version 4.3 of the eTIR specifications. The secretariat informed the Board also about the completion of technical guides describing the eTIR messages² and about next steps foreseen by the secretariat, in particular the preparation of conformance tests. Finally, the secretariat stated that it continued assisting customs authorities of several contracting parties in the interconnection projects, in particular Azerbaijan, Georgia, Pakistan, Tunisia, Turkey and Uzbekistan for the implementation stage.

Documentation: Informal document Nos. 5 (2020) and 3 (2021)

12. The Board was informed about developments related to the International TIR Data Bank (ITDB) projects managed by the secretariat, in particular of the start of the development of the TIR Carnet holder web portal. The secretariat, referring to the limited number of replies received, reminded the importance for all contracting parties to respond to two ongoing ITDB surveys. The Board reiterated its suggestion reminding all contracting parties during the next session of AC.2 the need to communicate their perspective on those two topics (see TIRExB/REP/2021/89draft with comments, para.12).

VII. Settlement of disputes between Contracting Parties, associations, insurance companies and international organizations (agenda item 6)

A. Draft new Explanatory Note to Article 6, paragraph 2 of the TIR Convention

13. Regarding the Romanian proposals contained in Informal document WP.30/AC.2 (2021) No. 6, TIRExB welcomed the analysis and amendment proposals in Informal document No. 9 (2021). The Board supported in principle the conclusions of the analysis and the amendment proposals based on them.

14. Ms. Rey-Bellet (IRU) stated that while IRU agreed with the amendment proposal in Annex I of Informal document No. 9 (2021) regarding the settlement of disputes, it could not agree with the proposals as contained in Annex II, for several reasons. She added that IRU was not clear either about how the proposed wording could be translated in terms of practical application. The secretariat expressed its availability to discuss with IRU the practical implications of the amendment proposal on IRU's procedures.

15. In order to clarify all the aspects before submitting the proposal to AC.2, the Board agreed that IRU would submit a document for its next session explaining the reasons why it could not agree with the proposal contained in Annex II of Informal document No. 9 (2021).

20. TIRExB welcomed the fact that the lessons learnt during the COVID-19 pandemic would be further considered and turned into specific actions by the relevant bodies. On this basis, the Board decided concluding the item for now and reverting to the issue in case of further developments.

X. Miscellaneous (agenda item 9)

A. Activities of the secretariat

21. TIRExB noted that the secretariat had launched the survey on customs claims for the period 2017-2020, as requested at its previous session with a deadline of 30 October 2021 (TIRExB/REP/2021/89draft with comments, para. 19). Further, the Board noted that the secretariat had sent the letter to the Moldovan national association summarizing its past considerations and the state of play regarding the problems reported by the transport companies from the Republic of Moldova in Ukraine (TIRExB/REP/2021/89draft with comments, para. 22).

22. Further, the secretariat stated that, in line with the activities foreseen in the TIRExB programme of work, they would initiate preparations for modernizing the TIR Convention and enhancing the intermodal use of the TIR procedure, the results of which would be submitted to the Board for consideration at its next session. It was added that

the results achieved from the studies on the decline of the use of TIR Carnets and the intermodal transport already provided substantial input and a roadmap on these items.

23. The Chair welcomed the initiative and pointed out the interest from all parties for further simplifications in the TIR system. He added that he believed the Board members, especially with their expertise in simplifications in the other transit systems, could well contribute in this process. Mr. Laborie (European Commission) stated that there would be merit in revisiting Informal document Nos. 16 and 26 (2018) on the intermodal transport as well as considering the possibilities offered by the new Explanatory Note to Article 49 and the need for the recognition of the subcontractors. Mr. Kabulov (Uzbekistan) underlined the importance of the confidence by authorities in the TIR system as a reliable transit regime. He added that, while modernization was a need for the TIR system, it should be realized without sacrificing from the security of the TIR procedure, particularly in terms of the information/data provided for declaration. The secretariat clarified that utmost attention would be paid to keeping the pillars of the TIR system intact to maintain it as a sustainable and reliable transit regime.

24. Ms. Rey-Bellet (IRU) stated that the private sector fully supported the work on the modernization of the TIR Convention so that it responds to the business needs. She added that already important achievements took place to that end with the entry into force of Annex 11 and other amendments to the Convention and that their member associations submitted other issues to them to be considered for further facilitation. Finally, providing examples such as opportunities for e-commerce shipments and postal consignments, the use of authorised consignor/consignee status and simplifications on the certificate of approval of vehicles, she said that they would present their proposals as a document to the next session of the Board.
