

# Mopeds?

Alex Blackburn;  
UNECE

**UNECE**

- Does the photo imply a style of “bike” that is no longer relevant?

## MOPED

Two, three or four-wheeled road motor vehicle which is fitted with an engine having a cylinder capacity of less than 50cc and a maximum authorized design speed in accordance with national regulations. Where limitations concerning the engine displacement are not applicable a restriction in terms of motor power may be in force. Refers to categories L<sub>1</sub> and L<sub>2</sub> of the UN Consolidated Resolution on the Construction of Vehicles (R.E.3).

*Registered and non-registered mopeds in use are included, whether or not they have a number plate. Some countries do not register all mopeds.*

- Would simply L1 and L2 be a better definition (50kmh maximum **design** speed), i.e. including “scooter” style mopeds?
- But if your statistics are based on registration, are all of these captured? Where is the line with electric bikes?
