

# Online inventory of thematic and extended accounts

(formerly known as Satellite Accounts wiki)

# A brief history...

## STATISTICS

- A growing user need for
  - More detailed information on certain sectors of the economy (thematic) or
  - Information including activities and assets that are not typically within the national accounts' boundaries (extended)
    - proliferation of satellite accounts
- The CES Bureau decided to carry out an in-depth review of satellite accounting in 2019 to identify challenges and best practices

# A brief history...

## STATISTICS

- Main recommendations from the in-depth review:
  - A general Guide to Satellite Accounting (in addition to rich guidance developed independently)
    - OECD Developing thematic satellite accounts
    - 2025 SNA (Chapters 34-39 Extended and thematic accounts and tables)
  - Online inventory of published satellite accounts (to learn from others)
    - UNECE in coordination with other IOs
- Results:
  - Satellite accounts wiki (2020), interactive website (2024):  
<https://stats.unece.org/tea/>
  - About 950 accounts from almost one hundred countries, covering nearly 40 different topics + international guidance

# Next steps...

## STATISTICS

- Further discussion with UNSD how to present the SEEA part (to avoid overlap)
- Cooperation with Eurostat, OECD and other IOs to improve the coverage of certain accounts (agriculture, social protection, tourism, health...)
- Further develop the data collection tool
- Consider possibilities to involve other UN regional commission to data collection
